Officer's Report

4.1.1 G - 1450409 - Change to Council's Portfolios

Summary

Due to the recent minor organisational restructure, it was necessary to review the existing Councillor Portfolio structure. The updated responsibilities of the Councillors are listed below.

Cr Wayne Kratzmann	Economic Development, Governance and Communication
C Keith Campbell	Finance, Planning & ICT
Cr Deb Palmer	Property & Human Resources
Cr Kathy Duff	NRM, Parks & Indigenous Affairs
Cr Barry Green	Water, Wastewater & Sport Development
Cr Damien Tessmann	Roads & Drainage
Cr Ros Heit	Arts, Communities, Health & Waste Services

Officer's Recommendation

That the following Councillor Portfolio structure be adopted.

Cr Wayne Kratzmann	Economic Development, Governance and Communication
C Keith Campbell	Finance, Planning & ICT
Cr Deb Palmer	Property & Human Resources
Cr Kathy Duff	NRM, Parks & Indigenous Affairs
Cr Barry Green	Water, Wastewater & Sport Development
Cr Damien Tessmann	Roads & Drainage
Cr Ros Heit	Arts, Communities, Health & Waste Services

Resolution:

Moved Cr KM Campbell, seconded Cr DJ Palmer.

That the Officer's Recommendation be adopted.

Carried 7/0 FOR VOTE - Councillors voted unanimously

4.1.2 G - 1449269 - Seeking support for the restoration of indexation of the Financial Assistance Grants to Local Government

Summary

Correspondence has been received from the Australian Local Government Association (AGLA) raising concerns about the impact on Local Government across Australia of the Commonwealth Government's decision to freeze the indexation to the Financial Assistance Grants (FAGs) until 2017-18.

The Association (ALGA) estimates that the full impact of the indexation will not be felt until the final year, by which time they estimate the South Burnett Regional Council alone will have lost as much as \$2,770,000.

The ALGA together with the Local Government Association of Queensland (LGAQ) are lobbying to assist local governments to ensure this critical funding source continues to be indexed.

The ALGA and LGAQ are seeking support from Council by way of:-

- 1. Council to forward a letter to its local Federal Members highlighting the specific implications of the FAGs indexation freeze; and
- 2. Council to pass a resolution acknowledging the importance of the Commonwealth's Financial Assistance Grants in assisting Councils to provide important community infrastructure and to acknowledge the receipt of Financial Assistance Grants from the Commonwealth in media releases and Council publications, including annual report.

Officer's Recommendation

That Council:

- 1. Acknowledges the importance of federal funding through the Financial Assistance Grants program for the continued delivery of Council's services and infrastructure;
- 2. Acknowledges the receipt of \$7,103,699 in 2014/15; and
- 3. Will ensure that this federal funding, and other funding provided by the Federal Government under relevant grant programs, is appropriately identified as Commonwealth grant funding in Council publications.

Resolution:

Moved Cr KM Campbell, seconded Cr RLA Heit.

That Council:

- 1. acknowledges the importance of federal funding through the Financial Assistance Grants program for the continued delivery of Council's services and infrastructure;
- 2. acknowledges the receipt of \$7,103,699 in 2014/15;
- 3. will ensure that this federal funding, and other funding provided by the Federal Government under relevant grant programs, is appropriately identified as Commonwealth grant funding in Council publications; and
- 4. forward a letter to its local Federal Members highlighting the specific implications of the Financial Assistance Grants indexation freeze.

Carried 7/0 FOR VOTE - Councillors voted unanimously

4.1.3 G - 1452033 - Operational Plan Update and Review Report

Summary

The Annual Operational Plan details the projects, services and initiatives that Council has planned to deliver for the 2014/15 financial year. Pursuant to section 174(3) of the *Local Government Regulation 2012* a report must be presented to Council detailing the progress towards the implementation of the Annual Operational Plan.

Officer's Recommendation

That the nine monthly update & review of KPI's for the Operational Plan 2014/15 be adopted.

Design & Technical Services Operational Plan 2014/15

That the Roads & Drainage Portfolio Report to Council be received.

Capital Works

- Brights Rd, Nanango
 - This rural road sealing and minor realignment job has been completed.

• Bunya Highway – Overtaking Lanes at Wooroolin

 This project involves constructing a widening along the western side of the existing Highway as well as a realignment of the Highway itself to improve safety. The crew needs to lay two layers of gravel and then the first layer of seal around mid June. This will see this project completed.

• Markwell St, Kingaroy

 This project will deal with the serious drainage issues that exist on Markwell Street between Kingaroy Street and Pound Street. The project has started and has the changes worked in to the project as requested by the business owners in Markwell St. This job is very wet however the crews are dealing with this issue. There is the major issue relating to traffic going through the project, in one day there was 27 infringements.

• Nanango Streetscape

• The crews continue to move up the hill of Drayton St. The issue of the removal of the 'square-about' has presented some issues with traffic flow however these will be shortlived once the concrete gangs complete the work required for the entrances into roundabout. This work will be completed within roughly one month on the roundabout. The laneway issues have now been sorted in consultation with business owners affected. The alfresco section will be the last part of the streetscape to be completed.

• Semgreen's Rd, Coolabunia

 Work has started on this job last Monday with the road closed for the period of the work to be completed. Like all parts of West Coolabunia there is a lot of water which is making the job slightly more difficult. However this job should be completed before the end of June.

• Ironpot Rd, Ironpot

• The prep work for this job has commenced, particularly in relation to the clearing of the site.

Maintenance

The following roads have been dealt with by the maintenance gangs across the region:

Southern crew

- Mercer Springate Road East Nanango
- Old Rifle Range Road Nanango
- Mt Stanley Road East Nanango
- Myletts Lane Bullcamp
- Mt Stanley Road East Nanango
- Bullcamp Road Bullcamp
- Bullcamp Runnymede Road Bullcamp
- River Road Bullcamp

Central crew

- Jacksons Road Durong
- Burra Burri Road Chahpingah
- Deep Creek Road Benair
- Kingaroy Burrandowan Road Chahpingah
- Freshwaters Road Chahpingah
- Greystonlea Road Ironpot
- Ironpot Road Boyneside

The crew will be in the Burrandowan/Ironpot area for a maximum of a further six weeks completing work in the region.

Northern Crew

• Byee Road Byee

- Chinchilla Wondai Road Durong
- McPhee Road Durong
- Coulsens Road East/West Chelmsford
- Weirs Road Chelmsford
- Old Chelmsford Road Chelmsford
- Red Hill Road Chelmsford/Fairdale
- Lower Red Hill Road Wondai
- Lysdale Road Wondai
- Springs Road Fairdale

This crew will be moving to the Proston/Speedwell area.

Design & Technical Services

Survey and design for the following projects has either been completed or is in the process of being completed and on the program for construction:

- <u>Proston Boondooma Rd</u> Prestart meeting with the Department of Main Roads next week.
- <u>Fisher St/Moore St Intersection, Kingaroy</u> The design on this program will be completed this week and then will be programmed for construction.
- **<u>Pring St, Wondai</u>** The water main design has been designed and will be programmed for construction.
- <u>Booth St, Kingaroy</u> The water main is being designed for the section between Roberta St and Railway Tce.
- <u>Hodges Rd, Kingaroy</u> This design is still being completed adjacent to the new Kingaroy Wastewater Treatment Plant.
- <u>Dalby St, Nanango</u> Design has been completed and will be programmed for construction.
- <u>Minmore Rd</u> Design has commenced to improve the section of road adjacent to the western leg of the Wattlegrove Rd intersection.
- <u>Nanango Lions Park</u> Preliminary design completed
- <u>Sandy Creek Footbridge</u> GHD have been commissioned to review the hydraulic efficiency of the creek and reduce the chance of inundation of the D'Aguilar Highway. This should be back to Council by the end of the May.
- <u>Glendon St Carpark (Circular PI), Kingaroy</u> The site has been surveyed and is in the programme to be designed.
- <u>Campbells Rd Bridge</u> The site has been surveyed and is ready for inclusion in the proposed bridge tender.

Given that most design projects are coming to the end, designers are starting to look to get an early perusal on projects for 2015/2016.

Footpaths

- <u>Albert St, Kingaroy</u> This footpath will be completed within a week.
- <u>Blake St, Proston</u> This complex design has been completed and has gone out for quotation and should be before Council at the next meeting to complete the job.
- <u>Scott St, Wondai</u> This job between the Datawave building and the Wondai Sportsground has begun.

IPWEQ Conference

Council is hosting the Institute of Public Works Engineers Australasia Queensland South West branch conference at the Kingaroy Town Hall tomorrow and Friday. This brings public works engineers from all over the South West region of Queensland to Kingaroy, and will have sessions on works in the South Burnett including the Kingaroy Wastewater Treatment Plant and the Levers Road, Murgon project.

Road Maintenance Performance Contract

It is worth noting to Council the issues that revolve around the Main Road contracts for the Road Maintenance Performance Contracts (RMPC), which is the contract offered by Main Roads for maintenance on their roads undertaken by Council. This contract is still not enough for Council to undertake meaningful work on main roads as requested by the state. Urgent attention by the Queensland Government in the run up to this budget will be needed otherwise Council may find itself in a situation where it dramatically struggles to undertake the work.

The work undertaken each year on the Burrandowan Road in anticipation for the Burrandowan Races is a classic example of where work needs to be undertaken every year by Council funded through the RMPC. Given that the contract is not keeping up anywhere near the cost increases faced by Council, the reality for the community may be that this work may not be able to continue at the same rate into the future. Council will be engaging with the Department of Main Roads to highlight the concerns we have going into the future relating to this program.

That the Communities, Communications & Arts Portfolio Report to Council be received.

Resolution:

Moved Cr RLA Heit, seconded Cr BL Green.

That the Communities, Communications & Arts Portfolio Report to Council be received.

Communities:

As reported previously South Burnett Regional Council was successful in securing \$18,800 for the 'get out get active' funding. The grant focus is to get women into exercise and activities. The health expo for this funding was held last Saturday. There were over a dozen stalls in the forecourt and beautiful weather made for a most enjoyable morning. Vicki Wilson the netballer was very inspiring and attracted a good crowd of interested and involved participants. Leisa Donlon also provided constructive ideas of how women can incorporate exercise into their daily life.

The rural localities selected under the Drought support funding are all working on their specific function and strategies to target those who may be isolated by the challenges in the rural sector in recent years. This funding is designed to strengthen the resilience of drought affected Queenslanders by revitalising the community support mechanisms. We are looking forward to seeing their events come to fruition in the months ahead.

The centenary of Anzac day was very well supported locally by SBRC, RSL's, various community groups and bands and of course the general public. Attendance at functions throughout the region were a credit to our community. I would also like to make mention of the launch of the WWI database online of all South Burnett veterans. The work undertaken particularly by Robyn Peterson and Daun Clapperton and also by the council staff assisting them has been remarkable, I applaud them and recommend the database to you.

Art: The extensive work done on Wondai Art Gallery to address the termite problem has now been completed. The Gallery volunteers have now repainted the remainder of the interior and arranged the floors to be re-sanded and lacquered. Next months' exhibition will be back in the Gallery. The Wondai community have been very grateful of the Council's work in fixing the problem and in allowing the gallery to use the Wondai town hall in the interim. It has been much appreciated.

Recently the submission for next financial years RADF was completed. The RADF partners with South Burnett Regional Council to provide welcome funds to support local art endeavours and training and is highly valued by the many groups it has assisted and developed. We are hoping the next years' submission will be successful to continue this support.

Libraries: More activities at the SB libraries this month:

Baby bounce, toddler rhyme time and story time all help promote language and literacy development. In addition these programs are free, fun, and important for every child's development.

Baby Bounce (aimed at children 0-18 months)

Kingaroy	3rd Monday of the month @ 10:00am
Proston	3rd Tuesday of the month @ 10:00am

Minutes of the Boondooma Homestead Management Advisory Committee Tuesday, 14 April 2015 @ 10.00 am

Registration of Boondooma Homestead's Name	At this stage the South Burnett Regional Council has not yet registered the Boondooma Homestead as a business name. Michael Hunter advised the committee that this would be completed by next meeting.	Michael Hunter	
North West Tourist Drive Map	Michael Hunter passed around drafts of the Tourist Drive map for comment and feedback from the committee. Changes to be sent to Stacey Perrett for completion. Version two to be sent to Cr Duff, Cr Heit, Lynn Bennett and Buddy Thompson for review prior to printing.		
Caravan Signage – Boondooma Homestead	Buddy Thomson advised that this was still a working progress.	Buddy Thomson	
Tank at the Dip Yard	Cr. Kathy Duff met with Clint Whittaker from the Department of Primary Industry's. Cr Duff advised that the responsibility of the Boondooma dip, tank and line falls with the DPI; therefore Council will no longer remain accountable for this.		
	The following email from Sarah Saxer was read to the committee.		
Insulation on Caretakers Cottage	Hi Mick, I am unable to do these in this year's budget. Can I suggest if you desperately need it done this year it come from your budget, otherwise it will have to wait till later in the year. Regards Sarah Saxer		
	The Boondooma Museum & Heritage Association Inc. would prefer the insulation to be installed this financial year to ensure		

	Minutes of the Boondooma Homestead Management Advisory Committee Tuesday, 14 April 2015 @ 10.00 am
	the comfort of their caretakers Resolution Cr Ros Heit will look into utilising discretionary fund to purchase the batts. <i>Moved: Buddy Thompson</i> Seconded: Mavis Metzroth Carried 13/0
Update on Cabins	Buddy Thomson advised that the letter to apply for an extension of time had not yet been completed, letter was then drafted and signed at the meeting and handed Russel Springall. Russel advised the committee that a change of development approval for the new shape of cabins is required due to the design changes. Previous approval was granted for separated cabin dwellings and now one roof accommodates all cabins. Russel further advised that there is potential to create more rooms which can open up possibilities for the future and at the appropriate time, gutters can be considered on the cabins for further water storage. Boondooma Homestead is very close to being secure and once hardware is fitted it will then be complete. Russel was happy to see that the Homestead concept had been achieved during restorations.
Blades for Tractor	Discussions where held regarding blades for the tractor. Bruce Bishop to gain quotes from Murgon Machinery. Michael Hunter to contact Don Johnson to see if blades can be purchased from other suppliers and also request information on preferred

 Arts Queensland- Invitation for applications for the 2015/2016 funding round-Closes 8/5/15

Discussions were held as part of the previous correspondence.

- Email from Elaine Madill advising that she will be away for the month of April Noted in the Apologies
- Queensland Touring Film Festival- In the Bin

Discussions were held regarding the possibility of linking this project to the 2016/2017 RADF funding bid.

Artour- Roadcase Toowoomba

Council's RADF Liaison Officer provided an update on the ArTour Roadcase that Council Staff and a couple of committee members attended. Council are to put in an expression of interest, for productions that will appeal to our community for the 2016/2017 year.

Gillie and Marc Art – Donation of artists time to create public artworks

Discussions were held regarding this proposal however, Council is not in a position for the 2015/2016 to assist in this project.

Fast Track- Talent Program proposal 2015

Discussions were held regarding this proposal however, Council is not in a position for the 2015/2016 to assist in this project. However it could be considered for the 2016/2017 RADF funding bid.

2.3 Outcome Reports

Outcome Reports were received by the following people.

2014/2015 Round 1

- 1. South Burnett Choral Society Inc- "Big Sing" \$5,230
- 2. Robyn Dower- Sense of Wonder \$990
- Queensland Rural Regional & Remote Women's Network Capture the Magic \$1,800
- 4. South Burnett Woodcrafters- Saw Scroll- \$1,060
- 5. Nanango Art Society- Nanango Art Fest- \$6,300

2014/2015 Round 2

1. Dr Akshay - McGregor Summer School- \$1,000

- Provide CV for Mat Phillips
- Eligibility Checklist to be provided for Matt Phillips
- Mat Phillips to provide evidence of availability

Moved Robyn Dower Seconded: Val McGrath

Carried: 6/0

Applicant: Rebecca Eryn Downie Description of Workshop: Certificate in Ballet Teaching- Royal Academy of Dance Amount requested: \$ 7,878

Resolution: That this application be not approved as it does not meet the RADF guidelines.

Moved Terry Jacobsen Seconded: Dot Rowlands

Carried: 6/0

2.5 2014/2015 Budget Review

Council's Cultural Services Coordinator, Michael Hunter provided an update on the 2014/2015 ACH & RADF Budget.

3. GENERAL SECTION

3.1 Other Business

• Film Festival 2015

Council's Senior Officer Community & Events advised the Committee that the National Film & Sound Archive have confirmed the date for this year's Big Screen Film Festival. It is to be held on 12 - 14 June 2015. He provided further updates regarding the movies we have requested and the possible 'Star".

• Red Carpet – Nanango State High School

At last year's Film Festival, the Nanango State High School loaned Council the red carpet for the Friday Night Red Carpet Event. However the carpet ended up being damaged and only half of the carpet was returned. Nanango State High School have requested that Council replace the missing carpet and have provided a quote from Andersons Carpets.

Resolution: The committee have requested Council source an alternate quote for a replacement carpet for Nanango State High School and also purchase a red carpet for all our future 'red carpet' events.

Moved:	Robyn Dower
Seconded:	Dot Rowlands

The Meeting was declared closed at 11.31 am

RADF 2015-16 will:

- grow local returns on arts and culture investments by being more flexible and focused on locally-determined outcomes and new ways of working
- encourage transparency and local decision-making in Government by supporting outcomes identified in local council plans developed in consultation with communities
- foster collaboration within communities and encourage new partnerships with private and others sectors to deliver improved outcomes

From 2015 the Fund will be delivered flexibly, and local councils can implement locally tailored RADF programs based on priorities determined by them and their communities. This means that RADF may look different place to place as to best respond to the ways of working and priorities and aspirations of local communities.

Who can apply for RADF investment?

- RADF investment is available to 59 eligible Queensland Councils <u>www.arts.qld.gov.au/funding/radf-councils.html</u>
 - Councils must have also satisfied the reporting and financial requirements of any previous Arts Queensland funding to be eligible to apply for RADF investment.

.....

How much can councils apply for?

RADF Tier	Population	\$ % AQ	\$ % Council	Arts Qld allocation capped amount *
1	0 to 5,000	90	10	\$25,000
2	5,001 to 25,000	70	30	\$30,000
3	25,001 to 50,000	60	40	\$40,000
4	50,001 to 200,000	50	50	\$50,000
5	200,000 +	40	60	\$100,000

* Councils may consider applying for funding above their allocated capped amount or ratio where:

- they can demonstrate their local RADF program will significantly contribute towards RADF assessment criteria, objectives and key outcomes
- they are financially contributing at a higher level than the defined % ratios and/or have secured partners who are investing into their local RADF program.

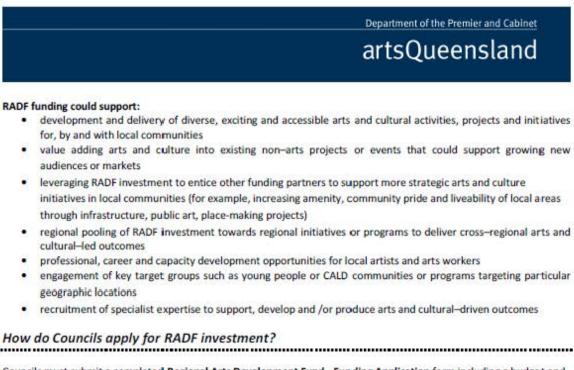

NOTE: There is a maximum request of \$120,000 per application.

What can Councils use RADF investment for?

.....

RADF funding is flexible and responsive and supports locally-determined decision making processes, delivery models and priorities to ensure councils and communities can invest in arts and culture-led outcomes that deliver value to them.

Councils must submit a completed Regional Arts Development Fund - Funding Application form including a budget and any relevant support materials by 3pm Friday 8 May 2015. Late or incomplete applications will not be accepted.

Applications should be submitted via online application <u>www.investment.arts.old.gov.au/radi-application/</u> Where Councils are unable to submit online, applications should be submitted by post** including a USB of all files to: Regional Arts Development Fund Arts Queensland, GPO Box 146, BRISBANE QLD 4001

Please be aware that applications must be received by 8 May 2015 - not just post-marked 8 May 2015

How will Council applications be assessed?

RADF applications are assessed by representatives from relevant Queensland Government agencies and/or appropriate industry experts who will make recommendations for funding to the Arts Minister, or delegate.

This application will be assessed on evidence of how well it meets the following assessment criteria. <u>Note:</u> The indicators listed are a sample of the types of evidence needed to demonstrate achievement of each criterion, and will vary according to the nature of the RADF 2015–16 program proposed.

Quality

- RADF invests in quality arts and cultural initiatives based on locally identified priorities
- RADF contributes to strengthening the professional and commercial capacity of the local arts sector
- Enterprising, effective, entrepreneurial and innovative approaches to RADF delivery are demonstrated

Viability

- Effective use of RADF funding
- Strong governance and management of RADF operational delivery and program at a local level
- Local partners are engaged in supporting RADF activities/projects
- RADF leverages additional investment including financial and in-kind contributions by Council and others.

Notification of outcomes

Arts Queensland funding investment towards local council RADF programs will be announced by end of July 2015. Councils will be required to submit an invoice and EFT form for payment.

Regional Arts Development Fund Agreement & Reporting

Successful councils and Arts Queensland will enter into a funding agreement noting specified allocation of funding, payment schedule, contractual responsibilities and KPOs based on their RADF 2015-16 funding proposals.

All Councils are required to complete annual outcome report including a summary of funded activities, overview of RADF investments made and feedback from local communities.

NOTE: Councils are responsible to ensure reporting and evaluation is completed in respect of all RADF funded activities including those by individual local recipients of funding awarded through RADF. These reports will contribute towards the overall annual outcome report.

.

Support in preparing your RADF application

Arts Queensland is playing an enhanced role in the delivery of RADF through provision of Partnership Managers to each local government to support brokering, liaison and advisory services to strengthen local capacity and build the value of RADF in local areas and across the state.

Local councils participating in RADF are encouraged to contact their Arts Queensland Partnership Managers to discuss application to RADF including:

- how local decision making for RADF may occur
- how administration of RADF will occur
- how RADF may contribute towards local priorities
- identification of possible local delivery models for RADF
- what allocation of RADF funding will be contributed by council
- what allocation of Queensland Government RADF funding is requested by council
- other contributors/partners/funding that has been secured by council towards RADF in your local area.

Contact us

To contact Arts Queensland Partnership Managers and seek further information about the program:

- email radf@arts.gld.gov.au
- contact your Partnership Manager by phoning (07) 3034 4016 or toll free 1800 175 531

Important information for all Arts Queensland applicants

All applications seeking Arts Queensland investment funding are subject to:

- Information Privacy and Right to Information
- processes for feedback and review of decisions
- agreements and contracts, acknowledgments, reporting and acquittal requirements for successful applicants.

Please refer to the document Arts Investment – Important Information for Applicants on the Arts Queensland website at www.arts.qld.gov.au

From: Katie Edmiston [mailto:Katie.Edmiston@arts.gld.gov.au] Sent: Thursday, 12 February 2015 3:30 PM To: Katie Edmiston Subject: RADF Update and other news

Hello out there in Council land - hope you are all well,

RADF UPDATE

I have been speaking with a number of you recently and I can confirm that the guidelines and application forms for RADF 2015-16 funding for councils to apply to Arts Queensland (formerly known as the bid) are planned to be emailed to CEO and RADF contacts on Friday 20 February.

With a number of teleconferences set up in the week beginning 23 February to discuss the new arrangements and answer your questions:

- Monday 23 February 2015 10:00am 11:00am
- Monday 23 February 2015 3:00pm 4:00pm
- Tuesday 24 February 2015 10:00am 11:00am
 Thursday 26 February 2015 10:00am –11:00 am
- Thursday 26 February 2015 3:00pm 4:00pm
- . Friday 27 February 2015 10:00am - 11:00 am
- Friday 27 February 2015 3:00pm 4:00pm

You are able to participate in any of the following dates. Let us know which one you wish to participate in by return email to Patrice Deere at patrice.deere@arts.gld.gov.au. Following your RSVP, Patrice will email instructions for the teleconference to you.

Look forward to talking with you all then, Katie

Roadcase is a one-day professional development and networking event for everyone involved in putting on performing arts shows, events and festivals in your region. For further info check out the flyer attached or go to http://www.artour.com.au/roadcase

THINGS TO THINK ABOUT

Cultural Tourism

I know that many of your councils are interested in the role that arts and culture can play in tourism ... Often being referred to as cultural tourism and sometimes creative tourism. Here are some resources that you might find interesting:

- Short general article on creative and cultural tourism.<u>www.accor.com/en/news/creative-</u> tourism-or-the-future-of-cultural-tourism.html
- Victorian Cultural Tourism website <u>www.culturaltourismvictoria.com.au/</u>
- Articles on Cultural Tourism (you may need to sign up to download but you can read online) www.academia.edu/1869136/What is Cultural Tourism/
- www.academia.edu/9491857/Tourism trends The convergence of culture and tourism Case study of Port Arthur www.oecd.org/cfe/tourism/42040138.pdf

 And at Arts Queensland we are gathering contributions in this field and publishing them to our Arts for all Queenslanders blog site <u>www.arts.gld.gov.au/blog/index.php/cultural-</u> tourism-the-insider-experience/

Arts and Health

The sights, sounds and smells of a hospital can make it a terrifying place, especially for children, but it doesn't have to be that way. Vital Arts, a British arts organization in charge of introducing art to Britain's hospitals, had 15 artists collaborate to turn the interior of London Royal Children's Hospital into as fun and colorful a place as a hospital can be. Check out what they did <u>http://www.boredpanda.com/artists-mural-design-royal-london-children-hospital-vital-arts/</u>

OPPORTUNITIES FOR YOUR COMMUNITY

YMCA Queensland Youth Parliament applications now open!

As a member of the YMCA Queensland Youth Parliament program you'll learn about government,

people. The program is apolitical, which means political views don't play any part in the way it is run. You must be 15 to 25 years old to apply. You don't need to know about parliament as you will be taught everything you need to know. One place is offered for each of the 89 <u>electorates</u> across the state. Four additional places are available for Aboriginal and/or Torres Strait Islander young people. To find out more visit the <u>YMCA Youth Parliament website</u>

Dear Wendy

Due to the fact that I will be overseas from the 2nd April, I will not be able to attend the meeting. I shall be home early in May. Thanks for the invite.

Kind regards Elaine Madill Wondai Regional Art Gallery Ph 07 4168 5926 wondaiartgallery@southburnett.qld.gov.au

Queensland Touring Film Festival (QTFF) is the latest venture from Australia's premier touring short film festival, In The Bin. From May 2014 All the way through to 2015, QTFF will tour the state, No region to far, or too small we are keen to provide an experience unlike any other for this great state. We also have specials for multiple venues.

The festival program spans five days in each community, inviting schools, businesses and the general public to take part in film workshops and events designed to educate and entertain. Rural and regional Queensland communities will benefit from learning, experiencing, and enjoying film, because opportunities for developing visual arts in Australia are not just confined to the big lights and big dollars of the capital cities.

Workshops

Two-Day Education Program

The soul of the festival: teaching and inspiring budding film makers in regional and rural communities that there are no boundaries to what you can achieve through film. In The Bin's signature educational component is compressed into a special QTFF two-day workshop at a local high school. Students break up into four teams to create, produce and edit their own short films, which are then screened at one of the selected nights of the festival. QTFF provides all the equipment needed and our dedicated instructors are always there to help when needed however students are encouraged to make their own creative decisions for their films. The workshop covers all areas of film making including story development, shooting, producing and editing, with a final product they can be proud of. By developing training resources online we will be able to shrink the education program allowing students to have more class time, more time to develop their stories for filming, and allow us to provide more events throughout the week. The student's scripts will be assessed prior to the workshop commencing to ensure the highest standard of work.

Super Shorts Workshop

Short films are as fun to make as they are to watch. This workshop is a practical session open to anyone with an interest in film to learn the foundations of good film making practices, from story boarding and production to editing. Make it a day of film – learn about short film making in the morning, and get set for a night of award winning films to be screened at the Festival.

Super Fly

This workshop is held at a local primary school and is a big hit with the little learners. Students will be filmed in groups creating a story with drawings or pictures on an interesting topic in front of our Blue and Green key screens. Students will then see their stories come to life through Chroma Key cutting-edge digital effects. The footage will be developed into 30 second films to be screened at one of the festival nights.

Program Cost

Total Package

The costs include accommodation, transport, trainers, computers, camera's, cinema packs, and support. The only requirements for communities are the locations for the events and workshops and the participants. We provide the rest. The total package cost is **\$7,150GST Inc.** This event would usually cost a minimum of \$10,000 however due to sponsorship and support we are able to provide it heavily discounted.

We can provide multiple locations for councils at discounted costs. We can also provide a selection of events to suit community budgets.

Festival events

The 'How To' Film Festival

This event can be held at a local high school or community space, and is open to school students in the surrounding areas and the general public. The How To Film Festival will showcase a mix of interesting short films and provide a discussion forum in between each film, to discuss the process and structures of making the film with the participants.

Silent Movie Night

The Silent Movie night is a major attraction of QTFF. Drawing audiences from near and far to a serene outdoor venue, the Silent Movie Night also involves the local community. We provide a local school band or community band with funds and the film to be shown a month prior to the festival, then they create their own soundtrack to the film which is performed live to the audience as the film is shown.

Australian Film Illumination Panel

(this event can be run at an additional cost.) A rare and intriguing insight into the real stories behind the film industry – revealed by the stars who make it happen. A selection of legendary industry professionals will attend a panel discussion open to the public at a key community venue.

They will discuss their lives in the industry and the challenges they face, while showing snippets of key elements from their work and discussing the processes, with opportunity for a question and answer component. This is a must-see event; you never know who might turn up...

In The Bin Film Festival

The main attraction – screening on the final night of the tour, the celebrated In The Bin Short Film Festival showcases six award-winning short films along with one feature provided by the Brisbane International Film Festival in an outdoor arena under the stars. This free event provides a unique cultural event for regional Queensland communities to enjoy.

This component of the festival also supports film makers, as all films which tour as part of QTFF are paid screening fees per location. QTFF is proud to incorporate this unique source of entertainment into its regional festival program.

Cairns • Winton • Toowoomba

Roadcase is a one-day professional development and networking event for everyone involved in putting on performing arts shows, events and festivals in your region.

Whether you are from council, on the RADF committee, a local arts council representative, involved in programming a festival, event or venue, a performing arts teacher, this event will help you:

CONNECT Meet presenters from neighbouring regions

PLAN Get an insight into possible shows and workshops that could come to your town

SHARE Hear about new opportunities and ideas to build audiences

Marketing, budgeting, programming and community engagement – Roadcase is full of practical resources and suggestions that will help meet the specific needs of your audience and community.

ARTOUR

arTour is Queensland's centre of contemporary touring knowledge.

It strengthens the capacity of producers and presenters across the state by brokering new connections, providing practical resources, offering professional development opportunities and assistance with touring logistics.

arTour is an initiative of the Queensland Government through Arts Queensland, part of the Department of Science, Information Technology, Innovation and the Arts.

Cairns Friday 20 March 2015 Winton Tuesday 24 March 2015 Toowoomba Friday 27 March 2015

TIME

10am to 4.30am (Registration from 9:30am)

S50 per delegate

REGISTRATIONS

Registrations are essential. Visit **artour.com.au/roadcase** Registration includes lunch, afternoon tea and refreshments.

ASSISTANCE

A travel subsidy is available for volunteer and unfunded organisations to assist with travel and accommodation costs. If you require further assistance please contact the arTour office on 07 3872 9041

Roadcase Program Outline

CAIRNS BOTANICAL GARDENS VISITOR INFORMATION CENTRE FRIDAY 20 MARCH 2015 WINTON TOWN HALL TUESDAY 24 MARCH 2015

TOOWOOMBA EMPIRE THEATRE FRIDAY 27 MARCH 2015

WELCOME & INTRODUCTIONS 10AM - 11AM

Who is arTour? How do we support Touring in Queensland?

Who's in the room? An opportunity to hear about each community, what's challenging, what's worked in the past, and what are you looking for.

PRODUCTION PITCHES 1115AM - 1230PM

A look at some of productions available for touring in 2015 & 2016 featured at Queensland Touring Showcase.

LUNCH (Lunch will be provided)

PROGRAMMING 1.15PM - 2.15PM

Viability – What's the cost of presenting a touring production? Determine what's affordable by looking at budgets and ticket pricing.

Funding & Support – what other income streams are available? A look at other revenue opportunities and different forms of support.

MARKETING 2.15PM - 3.15PM

Marketing and Audience Development – Who is the work for? How will you get them through the door? Practical marketing strategies and audience development ideas.

Timing – An outline of the key time frames and deadlines that are critical to developing tours, including those regarding marketing, funding, and planning.

AFTERNOON TEA

(Refreshments will be provided)

OPPORTUNITIES AND REVIEW 3.30PM - 4.15PM

What new circuits, collaborations and partnerships are possible, both within individual towns and across various regions?

What other types of productions/projects are you looking for? How else can arTour support regional presenters?

Which productions would presenters most like tour to regional Queensland?

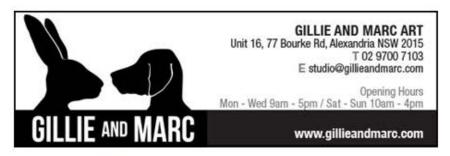

ROADCASE EVALUATION AND FEEDBACK 4.15PM - 4.30PM

arTour is an initiative of the Queensland Government through Arts Queensland, part of the Department of Science, Information Technology, Innovation and the Arts.

artour.com.au

On 04/02/2015, at 10:46 AM, Helen Cameron wrote:

Hi there,

Gillie and Marc are Sydney-based contemporary artists who work together as husband and wife and specialise in creating large scale bronze public artworks. Their public artworks can be seen all over the country - many of them featuring the artists' original hybrid characters, Dogman and Rabbitgirl, who have become iconic in their own right.

Gillie and Marc are passionate about being a part of bringing art to areas outside of major cities. They're particularly proud of their work in towns that are off the beaten track, because they have seen for themselves that art alone does have the power to bring people to an area.

Some of the councils Gillie and Marc have worked with before have wanted to create sculptures that embraced aspects of the regions history and the artists have seen first hand that this sort of work has the ability to revive an area.

Gillie and Marc believe that through public art it's possible to create a new attraction and draw visitors to a town because public sculpture creates a destination and a meeting place for tourists, passers by and locals alike.

In today's social media age, one of the most important aspects of creating a public artwork is insuring that it is interactive and engaging. In particular, people love being able to have their photo taken with an artwork. That's why, in the past Gillie and Marc have created bronze public sculptures that are timeless but also appeal to people who want their photo taken. For example, they placed Henry Lawson on a bench so that people can sit next to him and created a Diprotodon and rhinos that the public can climb on.

By depicting the historical and cultural significance of your town in a beautiful bronze public sculpture the businesses in your town will be able to benefit from the foot traffic and interest it will bring. Every town deserves art that speaks to the area's unique heritage and the people who live there and <u>Gillie</u> and Marc find great joy in creating these types of public artworks. They have the ability to work within budget thanks to ten years experience creating fine bronzes.

Gillie and Marc would love to offer a partial donation to your council!

What a partial Donation Means:

Gillie and Marc are lucky enough that they sell some of their pieces to private collectors and art galleries for over \$100,000. However these sales are quite rare and they understand that not everyone has this kind of money to spend on a sculpture. Gillie and Marc want to be creating public work for beautiful places all the time and have come up with a special, 'Partial Donation' offer that is a win-win situation for both parties. This means that Gillie and Marc will donate all of their artistic time and creative ideas coming up and designing a new sculpture for you. They will only ask you to cover the cost of the material and transport. This means that they are not out of pocket and you also get an incredible deal for a fully commissioned, unique and site specific sculpture. The price will differ depending on the type of material that you choose to use and the size and complexity of the sculpture. Gillie and Marc do this with the initiative to bring amazing public pieces to the world, as they are aware of the huge social benefits.

Materials they work in:

Gillie and Marc highly recommend bronze and this is their preferred medium as it weathers any climate and can last for hundreds of years. If you want the sculpture to go outside they would strongly suggest you choose bronze. However bronze is their most expensive material and they do have cheaper alternatives such as brass, stainless steel and fibreglass.

Gillie and Marc can also offer you interactive sculpture with interactive elements such as sound & movement, which is a nice alternative to explore. For example they created 3 running rhino's for federation square which is one of their most famous interactive pieces. This has a spare seat on the rhino's for the public to physically sit on and there are also inbuilt sound of a galloping herd of rhino's, so the public actually feels as if they are running with them.

The process:

If you choose to go ahead with the offer, the first step would be me organizing a conference call with you and Gillie and Marc. During this call Gillie and Marc will introduce themselves, what they are offering to you and will explain how they work. They will then discuss in depth with you themes, ideas and important thing relevant to your space. If you already have ideas for sculptures they will listen and take these on board. Following this conversation, Gillie and Marc will come up with a list of ideas for you. From this list you will choose 2/3 that you really love the sound of. They will then mock up these up as illustration in an in - depth proposal. Once you receive the proposal you will decide on the sculpture you wish to go ahead with. This will then get made into a clay mould and will require your sign - off. You will be involved throughout the whole process. Once you are happy with the clay, Gillie and Marc will cast it as a bronze sculpture (or with the material of your choice). This whole process takes up to 8 months.

Why a bronze public sculpture:

1. DESTINATION. Public sculpture enhances a location, making it a destination in its own right. 80% of the worlds attractions are man made.

2. UNIFYING. Public sculpture helps define a community and represents whats important to them.

3. STATEMENT. Public sculpture makes an artistic statement about creativity and importance of art.

4. INTERACTIVE. Public sculpture is accessible to everyone and allows the public to physically interact with it.

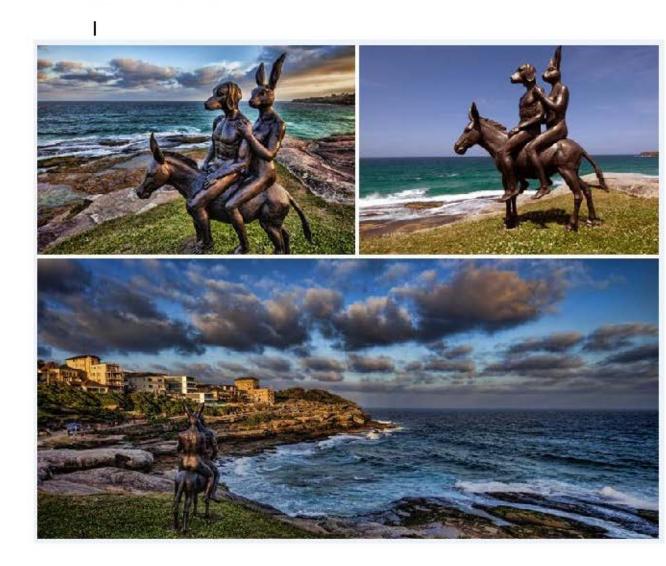

5. INCREASE VISITORS. Public sculpture will increase visitor traffic.

6. SOCIAL MEDIA BEACON. Public sculpture is shared across social media increasing awareness

7. LAST FOREVER. Bronze public sculpture can last over 500 years.

8. VALUE. Public sculpture works out to be less 100 dollars a year when you consider the life of it. Of all marketing it is greatest return on investment when you consider

the exposure it achieves.

From: Aiden Rayner <u>(malto: aiden@ywyomusic.com.au)</u> Sent: Wednesday, 4 March 2015 11:38 AM To: Michael Hunter Cc: Brazil Ben Subject: Fast Track Talent Program for South Burnett 2015

Hi Michael.

I wanted to get in touch with you regarding the National Fast Track Talent program that we're running with council all across the country at the moment. I'm excited by the possibility of putting this show on in your community. There is a great deal of talent in your community that would make this show work very well.

Please have a look over the event proposal below and fed free to pass it on to the appropriate people. Fast Track has an excellent track record with councils and communities in areas the size of South Burnett of providing extremely positive experiences for council, performers, audiences and the community at large.

I'll try to get in touch again later this week to discuss the possibility of putting this show together with you in 2015. We are flexible with how we deliver this and are able to work into and expand on any existing event as well as running an entirely separate successful stand-alone event. If you have any questions, please do not hesitate to get in touch. My contact details are below.

Kind regards, Aiden Rayner

FAST TRACK TALENT PROGRAM 2015

The Fast Track Talent Program is the largest talent show in Australia undemeath The Voice and X Factor and providy brought to you by Yamatia Music Australia. We are currently taking bookings for 2015 to run the Fast Track Talent show in communities across Australia - I would like to invite you to take part in the national showcase and bring your community to the stage. We work closely with youth groups across the country and give them first hand experience working on the events in areas they are passionale about. We will discuss how to provide a great experience for your youth committee if required.

(FYI- If you are looking for something special for Youth Week we can roll out an event without a problem or later in the year works well also).

Please take a moment to have a look at the attached proposal (below) and see why Fast Track Talent is the fastest growing talent competition in the country. We are bringing local communities to the stage and providing an experience for local performers that they will never forget. This show works because it is an opportunity for lots and lods of people from the community to come logether for a day and night of fun and entertainment Fast Track show case singers, dancers, bands, dance troops, classical musicians, comedians and anything else worth shourcasing.

COMMUNITY TO THE STAGE

FAST TRACK TALENT PROGRAM COUNCIL PROPOSAL 2015

Yoyo Music in Association with Yamaha Music Australia propose a partnership with your council to stage a Fast Track Talent Event in 2015.

FAST TRACK TALENT BRINGS YOUR COMMUNITY TO THE STAGE:

Fast Track Talent is the largest Family focused Talent Program in Australia underneath the TV shows 'The Voice' and 'X Factor'. Fast Track is the most successful community event model in Australia providing people in the performing arts with a vibrant platform to showcase their talent in each community. Fast Track is a fully produced talent event similar to Australia's Got Talent that comes to your local community with judges, prizes, sponsors, branding and an event team who run an amazing event. The Fast track team staged over 200 Fast Track events over 2013/2014. Just imagine having more than 50 acts (or 100+ Performers) promoting their involvement in your event to their own community. Welcome to Fast Track!

Fast Track Talent Showcases is a fully produced talent competition designed for each community.

- Fast Track Talent involves up to 100 acts from each local area to include (but not limited to) singers, bands, classical instrumentalists, dancers and dance troops, actors, comedians, music producers and more. Performers bring family and friends to each event which results in excellent attendances and community involvement.
- Recoup event costs through ticket sales and local sponsorships. Obtaining local dollar and in-kind sponsors for the show is easy with a trusted showcase platform.
- A respected entertainment industry panel to judge the day including scouts for the major TV shows.
- Amazing Prizes awarded at the end of the day for the best performances.
- Fast Track get your community involved to help promote and support your event. Fast Track work closely
 with their youth groups and provide them an amazing experience in event production.
- Fast Track brings the best names in entertainment to your community including guest performers from pervious years of The Voice and X Factor, Yamaha Music, Rode Microphones, Yoyo Music and more.
- The Fast Track team are the most experienced in Australia. The team has run over 200 Fast Track events
 and directors have worked closely with major entertainment brands including Big Day Out, Gotye, Australian
 Grand Prix and countless city council clients to name just a few. Fast Track bring this experience with the
 team delivering a valuable and respected event for your community.
- Fast Track staff are trained to ensure participants feel valued, supported and encouraged always.

WHAT YOYO MUSIC (EVENT PRODUCERS) WILL PROVIDE FOR EVERY EVENT Project Management, Administration and Marketing to:

- Develop a project and marketing strategy to ensure event objectives are achieved and project timelines are adhered to.
- Plan and confirm the best format for the event according to numbers and styles of performers, sponsor requirements (if applicable) and venue layout.
- Provide two Entertainment Industry Judges for each event plus a local judge.
- Manage the schedule to keep the event on time and ensure performers have an amazing experience (i.e. onsite Event Management).
- Provide a one off experience for youth groups and volunteers who can learn different roles in the event lead
 up, promotions, production and staging and MCing. Yoyo Music tailor this experience to each council
 depending on what kind of youth and volunteer groups are working in their area.
- Manage event staff and judges.
- Provide performer enrolment services through Fast Track's easy enrolment system.
 - Post a Welcome Pack containing event details and pre sold tickets to each performer.
- Integrate your event with the national Fast Track social media network.

BRINGING YOUR COMMUNITY TO THE STAGE

Yoyo Music to provide marketing material for each community engagement:

- Promotional information provided to reach out to local performers in your community to ensure the number of applicants is maximised.
- Fast Track branded posters and flyers with your event's specific information.
- Branded signage, brought by Fast Track Talent, at the event

COUNCIL'S ROLE

Yoyo Music will provide strategic direction and guidance to assist you to:

- Print and distribute communications materials to relevant community members and media.
- Discuss and agree on most effective local marketing campaign and in house marketing strategies.
- Ensure the venue is set up appropriately for a large family talent event.
- Engage sound and lighting services for the event.
- Engage 3+ event staff or volunteers and local business involvement on the day of the show.
- Refreshments for event staff and judges during the event.

PRIZE POOL MANAGEMENT

- Yoyo Music will work with council to build a valuable prize pool for the event.
- Yoyo Music will provide First, Second and Third prize trophies at no extra costs.
- As part of Yamaha Music sponsorship arrangements Yamaha will provide an acoustic guitar at no extra cost.
- Yoyo Music will provide an invaluable industry focussed prize that will provide winners with ongoing
 performance opportunities and involvement with the wider entertainment industry over the coming year.
- Yoyo Music to advise on engaging local business to provide sponsorships, prizes, volunteer support and extra publicity.
- Yoyo Music's Fast Track staff are official scouts for both The Voice and X Factor providing a rare opportunity for potential national TV exposure.

Cost for delivering the FAST TRACK TALENT event:

Costs are negotiated with you in good faith depending on dates, location, duration, venue capacity and ticket pricings. Yoyo Music are committed to working with you to ensure the event is great value for money event and something that you will want to develop as an annual event. Every booking is slightly different, so prices differ depending on your requirements and budget.

BRINGING YOUR COMMUNITY TO THE STAGE

A selections of clients who have staged their own events over the last 12 months are raving about its success and rebooking for next year:

COLAC City Council

Watch: https://www.voutube.com/watch?v=9hz3AD2aYVQ . Rebooking for 2015.

BURDEKIN Shire Council had over 650 people attending the town hall. A sold out event, rave reviews and profit margin achieved. Rebooking for 2015. (Refer jpg attachments from this event.)

LISMORE City Council - Highly successful event with Sony Music featuring the winner of Fast Track Lismore performing on the Sunday with Taylor Henderson & Jai Waetford as part of their National Pop Up Tour!

KINGSTON City Council at Moorabbin Town Hall- featuring performers from The Voice 2014. Large numbers of singers and dancers with hundreds of tickets sold.

CAPITAL CITY EVENTS - Fast Track staged over 100 events across Brisbane, Sydney and Melbourne last year to an average audience of 350 people per event.

Fast Track Talent Events are confirmed to be staged in Queensland, New South Wales, Victoria, South Australia and Western Australia in 2015. We aim to provide communities around our country with a wonderful event experience over the coming years.

That the Property Portfolio Report to Council be received.

1. Murgon Swimming Pool

Murgon Swimming Pool Upgrade will commence on Monday 18th of May. Stage one of the construction will focus on the construction of the amenities, kiosk, first aid room and office. In the first week Torbay Construction will set up site office and amenities, install signage, identify existing services and install temporary water and power and establish protection measures to existing pool. Council and Torbay Construction will implement pre start meetings to work through Murgon Pool Upgrade Safety Management Plan and implement site risk assessments, and review all workplace safe methods statements.

2. Council has recently been advised by the Department of Housing and Public Works that they are proceeding with our request to transfer Community Housing Assets in Murgon to the Department of Housing and Public Works in accordance with one of the options provided by the Department earlier last year.

The Department of Housing and Public Works has requested building inspections for the following properties:

Units 1 - 8 / 3 Jeffries Street, Murgon

Units 1 – 6 / 3 Wright Way, Murgon

Council officers will assist the Department of Housing and Public Works gain access to the premises and inspect each of the units.

3. Update on Land Sales – 19 lots under contract at Boondooma Dam.

Council has engaged consultants from IMEMS Pty Ltd to undertaken investigations and prepare a report validating the information previously listed on the Environmental Management Register for the 19 blocks at Boondooma Dam. This validation will allow Council to then make a submission to the Department of Environment and Heritage Protection to remove the listing from the register prior to the settlement of sale.

Council is tendering 6 blocks of land. All tenders close on the 22nd of May 2015. Land includes;

35 McLean Road, Durong 60 McLean Road, Durong 6 Harris St, Hivesville 28 Beresford St, Proston 35 Jellicoe St, Proston 19 Jellicoe St, Proston

Council received no tenders for Lot 7 CP864840 Cornish St, Kingaroy.

Kingaroy Wastewater Treatment Plant upgrade

AQM are progressing well with the overall design of the project with the 80% design milestone completed.

Milestone 2 funding claim for \$640,000 will be paid to Council in early May.

Budget is on-track and being managed appropriately by the project team.

Concrete works that have been completed or are underway include the inlet works, balance tank base and walls, base of Nereda tank 1 and 2.

Gordonbrook Water Treatment Plant upgrade

Design is progressing well with all packages at least 90% complete. The 80% design workshop was held in late March. An additional CHAIR workshop (Construction risks) was held in early April. Construction of the DAFF tanks is around 70% complete.

Initial earthworks at the site are progressing well and the PAC tank base cement has been poured with the walls planned for construction later this week.

Wondai Water Treatment Plant

Maintenance on the DAFF tank at the Wondai Water Treatment Plant was completed and the plant is up and running again. Council would like to thank the residents for limiting their water consumption during this time.

Water Supplies

- Dam levels
 - Gordonbrook 95% (increase of 12% since last meeting)
 - Boondooma 72% (same level since last meeting)
 - BP Dam 53% (5% increase since last meeting)

Summary

Waste, Natural Resource Management, Parks & Environment and Indigenous Affairs Portfolio Report to Council.

Officer's Recommendation

That the Waste, Natural Resource Management, Parks & Environment and Indigenous Affairs Portfolio Report to Council be received.

Resolution:

Moved Cr KA Duff, seconded Cr RLA Heit.

That the Waste, Natural Resource Management, Parks & Environment and Indigenous Affairs Portfolio Report to Council be received.

<u>Waste</u>

Construction work at the Cloyna transfer station is now complete and all safety railing and chutes have been installed. Construction work at Hivesville, Durong and Brigooda has been completed and we are just waiting for the installation of safety rails, shoots and guide rails. The community composting workshops that were held on the 27 and 29 April, 2015 in Kingaroy were well attended and the feedback has been very positive. The school visits were also well received. This segment of workshops and school visits was funded as part of the waste collection contract because there is a provision each year for education as part of the agreement.

<u>NRM</u>

Six professional trappers are working across the region for the next five weeks to assist 67 landholders to develop trapping skills and manage wild dog and feral pig problems. Landholders have been taking up Council's offer for equipment and continue to borrow wild dog traps, rabbit traps, splatter guns and our quick spray units to assist with weed treatment and feral animal control. Another coordinated baiting program will be held across the region from the 18 – 22 May. Approximately 50 hectares of declared and environmental weeds were treated in April including Lantana, Madeira Vine, Groundsel, Giant Rats Tail, Water Hyacinth, Honey Locust and Giant Parramatta Grass. Firebreaks in the northern part of the region have been slashed in preparation for fuel load reduction burns and firebreaks in the southern part of the region are also being prepared. The rebuild of the dip race at the Proston dip yards has been completed and the floor on the double decker loading ramp at Coolabunia Saleyards is currently being replaced.

Parks and Gardens

The major focus has been for the very special Centenary Anzac Day Services that were held around the region. Things are settling back down now to the normal maintenance program.

The Rail Trail

We are currently in the community consultation phase and on Monday and Tuesday of this week there has been a stand in the Kingaroy Shopping World. The stand has created quite a bit of interest and feedback so far. Today the stand will be 2 hrs in Memerambi, 2hrs in Wooroolin, and 2hrs in Tingoora. Tomorrow there will be a stand in the CBD in Wondai and on Friday it will be in the CBD in Murgon.

Indigenous Affairs

The Reconciliation Fun Run is this Sunday. Registrations are still being taken online before Friday night or you can call in to the Ration Shed or CTC in Murgon today and tomorrow. It is only 7.5 klms and I along with the Mayor and I believe Cr Heit will be participating. Petero Civoniceva will be participating and he will be joined by Shannon McCann the Commonwealth Games finalist in hurdling, Larissa Chambers who is a Junior National Sprint Champion and Rhonda Purcell who is an International Gold medallist in body building. There will be prizes for first across the line in different age groups and also for the best dressed team. As part of the day there will be free Deadly Sports Workshops on rugby league, basketball, cricket and soccer. There will be lots of free activities for the children and Reconciliation Qld are holding a Reconciliation Trivia Games Tournament. Community Health will be providing free fruit smoothies, fresh fruit and water throughout the day. South Burnett CTC will be organising lunch. The Ration Shed will be open all day for visitors to see their amazing displays and the profits from the day will all go towards the future upkeep of this wonderful attraction for Cherbourg.

Document created January 2015

1 EXECUTIVE SUMMARY

The South Burnett Regional Council came into existence following the amalgamation of the Kingaroy, Murgon, Nanango and Wondai Shire Councils.

This is the first waste management strategy developed since the new Council was created. This strategy has focused strongly on reviewing the mix of the inherited waste facilities and services. There are seventeen (17) current waste facilities.

There is a need to plan ahead to establish an appropriate waste facility network that will provide for the future waste disposal needs of the South Burnett. This Waste Strategy has been developed after an extensive review of the existing Waste Management situation as well as the regulatory environment in which the South Burnett Regional Council's waste services exists. Council has proposed its preferred position for waste management into the future. This Strategic document has included provision to address the higher order waste hierarchy principles of Waste Avoidance, Waste Reduction and Reuse, while also concentrating on waste collection, treatment, resource recovery and disposal.

The concept of a Waste Hierarchy has been a guiding principle throughout this strategic waste planning exercise. This document also seeks to be viewed as the South Burnett Regional Council's Waste Reduction and Recycling Plan in fulfilment of the statutory requirements of the *Waste Reduction and Recycling Act 2011.*

The Council's vision is to progressively close minor landfills, many of which are already at or soon to reach capacity, and utilise transfer stations and transition to the larger regional landfills. Then ultimately one super landfill, whether locally or outside of our region, may service all of the South Burnett. Provision for some flexibility has been incorporated into the proposed waste management model in order to adopt any commercially viable alternative waste treatment technologies or innovations that may become available in the future.

The South Burnett Regional Council's Waste Management Plan 2015-2022 culminates in the proposition of six (6) Strategy Goals, with various Action items, which provides the framework for realising the Council's vision for Waste Management into the future within the South Burnett. The six (6) Strategy Goals are:

- 1. Provide community waste education.
- 2. Provide cost effective, safe, environmentally responsible & efficient waste collection operations.
- 3. Provide an appropriate network of waste transfer and disposal facilities.
- Provide responsible management of waste facilities
- 5. Provide landfills to meet the regions long term waste disposal needs.
- 6. Provide opportunities to reduce waste to landfill.

The Action Items are summarised at section 5.5 of this document.

This draft document is presently released for public consultation and will be open for comment for a minimum period of 28 days. Following the community consultation period a report outlining the community input received shall be presented to Council for their information and guidance in making any changes to the final Waste Strategy. Once any changes to the draft Waste Strategy have been incorporated, as a result of the public consultation process, then the final Waste Management Strategy will be presented to Council for approval and adoption.

2 OVERVIEW

The South Burnett Regional Council (SBRC) came into existence when the Kingaroy, Murgon, Nanango and Wondai Shire Councils amalgamated in 2008. This Waste Management Plan has been in the development process for a considerable period of time. Competing priorities, limited funds and reductions in state and federal government resources have hindered its completion. However, behind the scenes Council has been working to improve, integrate and standardise its waste services activities across the shire as many of the activities of the four (4) pre-amalgamated Councils varied significantly from one another.

This document outlines the current situation of waste management in the South Burnett Region as well as detailing the Council's vision and future direction for waste management. The South Burnett Regional Council's Waste Management Plan has sought to consider all aspects of waste as it relates to the community here in the South Burnett, from waste prevention and minimisation, to waste collection, it's possible or applicable treatment, resource recovery and final disposal.

Each of the current waste facilities have been assessed and considered as to its continued inclusion in the Council's overall Waste Management Strategy for the future. Council has also identified and been planning for the security of the South Burnett's waste disposal needs into the future.

This Waste Management Plan primarily has a short term focus (i.e., the next seven years). However, the waste planning process has attempted to also take into consideration medium and longer term risks/opportunities that could have an impact upon future waste management operations.

Waste management is no longer just about throwing waste into a hole at the "dump". The landscape of waste management has become a highly regulated environment, impacted by federal and state governments as well as expectations from industry and the community. Health and safety, environmental protection, climate change, resource recovery and recycling are all key areas that must be considered, planned for and addressed. Some of these identified areas are regulated by legislation and as such Council is obligated to comply. This has implications for the South Burnett community as these requirements are enforced or passed on to the general population.

The major areas of association with waste management for most residents of the South Burnett are the Waste Collection Service and Waste Disposal. Waste collection from households is governed by state legislation, while all the other aspects of waste management that Council is involved in is largely influenced by demand, benefit to the community and what level of involvement there is by the private commercial sector. The total waste stream that Council manages is composed of waste generated by Domestic, Commercial, Industrial and Demolition customers.

The waste planning process has identified a number of issues for management and/or action. These actions have also been prioritised and are planned to be programmed into the forward capital work program and/or operational plans for the waste management area.

This strategic document has also endeavoured to anticipate what new, emerging or alternative technologies may present themselves in the future which could be beneficial to our regional local government area. Therefore, it has been essential to build in some flexibility into the present and future waste management operations in order to be able to take advantage of these situations, should they arise.

As part of this review of the South Burnett Regional Council's waste management operations Council has been and will continue to be in discussions and work with its fellow neighbouring Councils on waste management issues. It is the goal of the Wide Bay Burnett Councils to work together to provide sustainable region wide positive waste outcomes.

2.1 THE VISION

The overarching vision of the South Burnett Regional Council, as provided in the Corporate Plan, is:

Individual communities building a strong and vibrant region

The South Burnett Regional Council Corporate Plan outlines the key strategic priorities for the organisation. In regards to the Council's Waste Services section it is encapsulated under the Environment Strategic Priority, which is:

A sustainable environment, proactively and responsibly managed in partnership with the community for future generations.

The Goal to be achieved is:

ENV2 Environmentally responsible and efficient waste management

The underlying Strategies to be implemented in order achieve the above goal are: ENV2.1 Develop and implement a Regional Waste Management Plan ENV2.2 Provide cost effective waste management facilities and operations

2.2 OBJECTIVE

This Waste Management Strategy will detail the Council's vision and future direction for waste management within the South Burnett.

In order to give effect to the above objective a review of all South Burnett Regional Council waste operations has been undertaken with reference to the need for legislative compliance as well as taking into consideration regional and site specific constraints.

The waste planning process has established a number of key strategic goals for the waste management area. A number of critical actions have subsequently been identified which need to be completed in order for these goals to be achievable. Also, as part of the planning and review process of the waste portfolio there have been other issues identified which need to be managed and/or actioned, which have been aligned with one of the specific Waste Management Plan's strategic goals. Each of these action items has been prioritised and a proposed timeline allocated.

2.3 STRATEGY FRAMEWORK

The strategy is divided into waste management functions relating to areas that the South Burnett Regional Council has some involvement in and influence over. A description of the specific functions and services involved are provided below.

Strategy Vision Focus	Services Involved
Waste Avoidance, Minimisation & Reuse	Community Waste Education
Collection Services	240L kerbside general waste wheelie bin (Domestic & Commercial)
	Street & Park Litter Bin collection
Waste Transfer and Disposal Facilities	Transfer Stations
	Landfill sites
	Liquid Waste Disposal Facilities
Resource Recovery	Recycling
	Alternative Waste treatment Technologies (potential for)

Table 1: Strategy Framework

3 BACKGROUND

3.1 REGULATORY FRAMEWORK

The landscape of Waste Management has become a highly regulated environment, impacted by federal and state government laws and policy positions as well as being influenced by industry.

3.1.1 National Waste Policy

The National Waste Policy is an overarching federal document providing direction to the states for future waste planning and change, with specific interest on resource recovery.

The National Waste Policy is strong on advocating partnerships in order to provide beneficial outcomes. Extended Producer Responsibility programs have been the major focus at present under the Policy. For example, the collection and recycling of electronic waste (e.g. the National Television and Computer Recycling Scheme).

3.1.2 Mandatory Renewable Energy Targets

By 2020 twenty per cent of Australia's electricity is to be produced from renewable energy sources. This requirement is known as the "Renewable Energy Target (RET)". Annual targets have been set by the government and it is incumbent upon the Australian electricity retailers and large wholesale purchasers of electricity to demonstrate compliance with these annual targets. Failure or inability to meet these annual targets can result in a charge for every megawatt per hour short of the required target.

Needless to say that Australian electricity retailers are looking for and are interested in renewable energy projects for incorporation into their electricity supply mix. Waste to Energy initiatives would fit into the renewable energy category. More on this subject will be discussed later in this Waste Strategy.

3.1.3 Clean Energy Act 2011

The *Clean Energy Act 2011* (Commonwealth law) provided for a national carbon levy, which was applicable to all large landfill facilities having emissions in excess of 25,000 tonnes of carbon dioxide equivalent (CO2e) in a single year. Emission calculations had to also factor in surrounding waste facilities and their waste disposal volumes and emissions if they are within a certain distance to the landfill in question. If the particular waste facility was over the threshold amount then the carbon levy would have been applicable.

The Clean Energy Legislation (Carbon Tax Repeal) Act 2014 was given assent on 17 July of 2014 which effectively repealed the Clean Energy Act 2011. Therefore, local government has a reprieve from a carbon levy on (large) landfills at least for now.

3.1.4 Queensland Waste Avoidance and Resource Productivity Strategy 2014 – 2024

The state government released their draft Queensland Waste Avoidance and Resource Productivity Strategy in the first half of 2014. The final version of this strategy was released in January 2015. The Vision of this document is that:

"Queensland will become a national leader in avoiding unnecessary consumption and waste generation, adopting innovative resource recovery approaches, and managing all products and materials as valuable and finite resources."

The strategy is underpinned by five guiding principles:

- 1. Protecting human health and the environment to secure our future prosperity.
- 2. Sharing responsibility for avoiding unnecessary consumption and improving resource management.
- 3. Recognising of the economic, environmental and social costs of waste generation and disposal.
- 4. Recognising of regional differences and opportunities.
- 5. Full lifecycle management of resources.

There are four (4) key objectives:

- Objective 1-Driving cultural change;
- Objective 2—Avoidance and minimisation;
- Objective 3-Reuse, recovery and recycling
- Objective 4-Management, treatment and disposal

Voluntary Action Plans are also proposed under the State Waste Strategy and will be developed by government and peak industry bodies which provide the detail under the Strategy outlining how the objectives will be achieved.

3.1.5 Environmental Protection Act 1994 (QLD)

The *Environmental Protection Act 1994* and its subordinate legislation (Regulation and Policies) are Queensland's legislative framework to protect Queensland's environment, while allowing for ecologically sustainable development.

This legislation impacts directly upon all local governments, including the South Burnett Regional Council, as landfills must be licensed/registered by the State Department of Environment and Heritage Protection (DEHP).

The planning, location and design of a waste facility is regulated by the abovementioned legislation and the associated approval processes within DEHP.

The day to day operations of a waste facility are controlled by conditions imposed on the Council's licence/registration during the application and approval process, which are then monitored and enforced by DEHP.

3.1.6 Waste Reduction and Recycling Act 2011 (QLD)

The Waste Reduction and Recycling Act 2011 objectives are to:

- Promote waste avoidance and reduction, and resource recovery and efficiency actions;
- Reduce the consumption of natural resources and minimise the disposal of waste by encouraging
 waste avoidance and the recovery, re-use and recycling of waste;
- Minimise the overall impact of waste generation and disposal;
- Ensure a shared responsibility between government, business and industry and the community in waste management and resource recovery;
- Support and implement national frameworks, objectives and priorities for waste management and resource recovery.

In order to achieve these objectives the legislation provides for the following:

- (a) preparation, implementation and maintenance of a waste management strategy for the State [The state government released their Draft Queensland Waste Avoidance and Resource Productivity Strategy in April 2014. Further specific details relating to the State Waste Management Strategy are provided above under the separate regulatory framework heading entitled Queensland Waste Avoidance and Resource Productivity Strategy 2014-2024.];
- (b) preparation of State, local government and industry strategic waste management plans. [There is also a requirement for local government to prepare a waste reduction and recycling plan. The South Burnett Regional Council has endeavoured to incorporate the requirement of this obligation into their Waste Management Plan document.];
- (b) reporting requirements (including waste and recycling data) for the State, local governments, business and industry [Local government was reporting this data to DEHP on a monthly basis, but the state has recently changed to this reporting frequency to quarterly.];
- (c) a waste disposal levy as well as banning particular waste disposal. [The state government did implement a waste levy in 2011, which was reduced to zero once the change of government occurred in 2012. This particular provision however presently still exists within the legislation and could be established again should the incumbent government wish to.];
- (d) identifying priority products and associated management tools;
- (e) preparation, implementation and maintenance of a priority product statement;
- (f) providing for product stewardship schemes;
- (g) waste tracking requirements;
- (h) granting approvals of resources for beneficial use;
- prohibiting particular conduct in relation to waste [Littering and waste dumping offences are now contained within this particular piece of legislation and also provides for public reporting of these types of offences direct to DEHP.];
- appointing authorised persons to investigate matters arising under this Act and otherwise to enforce this Act;

3.1.7 Australian Packaging Covenant

The Australian Packaging Covenant is an agreement between government, industry and community groups to fund solutions to address packaging sustainability issues.

The Australian Packaging Covenant (APC) specifies that its aim is, "to change the culture of business to design more sustainable packaging, increase recycling rates and reduce packaging litter."

To help give effect to this aim brand owners with a turnover larger than \$5 million are required to either sign the APC or comply with the *National Environmental Protection Measure (Used Packaging Materials)* 2011. Brand Owners who sign up to the APC pay a yearly contribution. These monies are used to resource the various packaging projects that are submitted for funding. Projects must be sustainable, cost effective, deliver savings against identified targets and must help towards the achievement of APC's goals, namely improving packaging design, recycling of packaging and product stewardship through the established supply chain.

3.2 THE SOUTH BURNETT REGIONAL PROFILE

The South Burnett Regional Council (SBRC) was formed in March 2008 as a result of state-wide local government amalgamations. The Councils that amalgamated to become the South Burnett Regional Council were the Kingaroy Shire Council, the Murgon Shire Council, the Nanango Shire Council and the Wondai Shire Council.

The South Burnett Regional Council is located in South-East Queensland. The new SBRC region covers an area of 8 399 km2 and is only a short drive away from Brisbane, Toowoomba and the Sunshine Coast.

Figure 1: South Burnett Regional Council Locality Map within Queensland

Source: Queensland Government, Department of Local Government, Community Recovery & Resilience) 2014

3.3 POPULATION TRENDS AND WASTE GENERATION PROJECTIONS

3.3.1 Population Projections

Queensland Treasury and Trade has advised that the population projections for the South Burnett continue to be positive into the future. The Queensland Government estimates a modest increase for the South Burnett of 1.1% per year over the next 25 years. The state of Queensland in comparison is expected to continue to increase in population by 1.9% over the same period.

Table 2: South Burnett Population Projections

2031	2026	2021	2016	Year
9.509	37 504	25 721	22 940	Projected
	37,594	35,731	33,840	Population

The implications of this are that the number of persons in the South Burnett is expected to increase from 32,641 (30 June 2013) to 39,509 persons by 2031.

3.3.2 Total Waste Disposal Projections

Future planning for waste disposal volumes requires some extrapolation of the present waste situation, while factoring in some known variables. If the recycling, reuse and waste generation factors all stay the same over the coming years then based upon the estimated population projections, the amount of waste that would be expected to be generated in the South Burnett are provided below.

Table 3: Projected future Total Waste (Tonnes) to be Disposed of within the South Burnett

Year	2016	2021	2026	2031
Total Waste (tonnes)	19,951	21,066	22,164	23,293

These projections could be less if further waste reduction, diversion or recycling measures are implemented in future years.

3.4 CURRENT WASTE SITUATION

3.4.1 Waste Collections – Current

The South Burnett Regional Council's inherited waste collection services consisted of:

- A weekly 240L general waste wheelie bin service (domestic and commercial customers, provided by a mix of private contractor and Council day labour);
- A weekly 240L split wheelie bin service catering for recyclables items and general waste (domestic customers only in the old Nanango shire and provided by private contractor);
- 1, 2 or 3m³ bulk bins (normally a service provided to a commercial customer. Service frequency was able to be provided six (6) days a week if required. This service was also provided by a mix of private contractor and Council day labour); and
- 10 or 27m³ skip bins (services provided to a large commercial client or at a transfer station. This service was also provided by a mix of private contractor and Council day labour).

These waste collection services have changed since the new waste collection contract commenced on 1 July 2014. The details of these changes are provided below.

3.4.1.1 240L WHEELIE BIN WASTE COLLECTION

The waste service with the highest profile is the kerbside waste collection service, which is provided via wheeled bins. A weekly wheeled waste bin service is provided to premises in the major urban areas. A number of outlying and low-population rural areas are also provided with services depending on their proximity to townships and proximity to current collection vehicle routes. There are 13,279 wheelie bins serviced weekly throughout the South Burnett.

The South Burnett Regional Council has continued to retain the obligation to provide waste services to its domestic clientele under the latest waste collection contract. It has also due to economies of scale and efficiencies continued to provide this 240L wheelie bin service to the commercial businesses within the designated waste collection/service area. Council has however chosen to outsource the responsibility of actually providing the delivery of those services to a private contractor.

The Nanango shire residential community did have an exclusive weekly 240L split wheelie bin, for general waste and recycling, for six (6) years or so during the period of the previous Nanango waste collection contract, which concluded 30 June 2014. Segregated uncontaminated recyclables, namely cardboard, paper, aluminium cans, steel containers and plastic containers, where stored and then transported to Toowoomba or Brisbane for sorting and processing through a Material Recovery Facility. Further details on the recyclables collected via the Nanango kerbside split bin can be seen at Table 16: Nanango Split Bin Recycling Data by financial year (Tonnes), see section 4.3.2.

Resource restrictions and time limitations posed by the expiry of the previous waste collections contracts (30 June 2014), that had been in place prior to amalgamation, meant that this strategic document was not able to be released and/or finalised before the decision relating to the waste collection contract needed to be made. The waste collection contracts were soon to expire and this aspect of the waste management program needed to be addressed as a matter of priority. A new waste collection arrangement was going to have to be organised irrespective of any strategic waste planning process undertaken and any formal document that was to be subsequently created.

The preparation time required for the development of a comprehensive waste collection tender can be up to eighteen months and involves a detailed review of the service requirements/standards and the creation of the actual tender documents. Then time is required for the potential contractors to consider the tender and submit a proposal, which can be up to six months. Once submissions are received there is the assessment of tender submissions and the awarding of a contract, which can take up to three months. Then finally the last stage involves the preparation for contract implementation, which can require from nine up to twelve months. The contract implementation phase involves organising equipment, plant, vehicles, manufacture of waste bins & waste bin roll out. The time required for the whole waste tendering process can be just over three years, if done thoroughly.

As part of the initial evaluation for the development of a waste collection tender Council did consider whether it would undertake the waste collection services totally by day labour or whether it would just contract out the delivery of those services. Initially Council had determined that its Waste Services section would put in an in house bid as part of the waste tendering process so that any final decision would be open the best value for money solution. However, in the end Council decided that its own Waste Services section would not be submitting. Council also considered what type of services it wanted as part of a new kerbside waste collection service.

The decision about the length of the South Burnett Regional Council waste collection contract was influenced by discussions with other Councils within the Wide Bay Burnett region. The Wide Bay Burnett Regional Organisation of Councils Inc (WBBROC) was formed in 2000 to represent the interests of all councils within the Wide Bay Burnett region. Its membership comprises of the the Bundaberg Regional Council, the Cherbourg Aboriginal Shire Council, the Fraser Coast Regional Council, the Gympie Regional Council, the South Burnett Regional Council and the North Burnett Regional Council. The key goals of WBBROC are to:

- Deliver improved economic outcomes for the region
- Drive infrastructure development and investment in the region
- Facilitate planning at a regional level
- Provide collaborative leadership for the region.

A subsidiary group, the Waste and Recycling Advisory Committee (WRAC), which reports to WBBROC was recently established. The Terms of Reference for the WBBROC's Waste and Recycling Advisory Committee is to:

- a) Advise WBBROC on matters related to regional waste and recycling service provision;
- b) Make recommendations to WBBROC concerning prioritised regionally significant waste and recycling issues;
- Making recommendations to WBBROC to assist in the implementation of prioritised regionally significant waste and recycling service provision projects;
- Engaging the community, business and industry sectors concerning waste and recycling processes in the Wide Bay Burnett region; and
- e) Where necessary advocating for community, business and industry and local government in the Wide Bay Burnett Region.

One of the outcomes of this group has been for all member Councils to align their waste collection contracts to coincide and expire with other Councils within the WBBROC Region. This decision was made in relation to exploring the possibility of having one large waste collection contract across the whole wide bay region. To this end the South Burnett Regional Council's new waste collection contract commenced on 1 July 2014 and will continue until the first contract expiry date, namely 2 July 2022.

3.4.1.2 BULK WASTE COLLECTION

The South Burnett Regional Council post amalgamation was providing bulk bin (1, 2 or 3m³) services to commercial customers via a mix of day labour and private contractor. Servicing regimes and frequencies varied greatly depending upon which old local government area the service had historically been provided in.

Bulk waste collection includes commercial waste, construction and demolition waste.

Toward the end of the old waste collection contracts the South Burnett Regional Council was servicing 183 bulk bins per week.

Council noted over a period of time leading up to the expiry of the old waste collection contracts that many of its commercial bulk bin customers had cancelled their service and were dealing direct with a private waste collection contractor. The old waste collection contracts did not expressly prevent this activity nor would the national anticompetitive legislation permit such a position to be held. This erosion of Council's customer base meant that the critical mass required in order provide a cost effective service to its customers was becoming difficult to maintain. Further, if Council went out to tender and specified that it had a certain number of commercial bulk bin customers and a contractor tendered on that basis and then by the time the contract commenced the commercial customer base had further declined and proceeded to do so over the life of the new waste collection contract then the ongoing viability of that particular service could be jeopardised. Additionally, there were concerns over transparency and traceability of waste where Council and non-Council customer waste was being collected by the same contractor in the same vehicle.

At the time of considering this situation there were three separate commercial waste collection companies operating in the South Burnett area. As there seemed to be sufficient competition in the local market for commercial bulk waste collection services Council determined to no longer provide this service. Therefore, the waste collection tender reflected this position and all bulk commercial waste services within the South Burnett are now provided by private companies and their services are totally unrelated to any Council involvement.

3.4.1.3 SKIP BIN WASTE COLLECTION

The South Burnett Regional Council presently has a number of waste transfer stations. Most of these are services with either 10 or 27m³ skip bins. These large skips bins are serviced by a Roll On Roll Off (RORO) vehicle. After discussions with other Councils and waste collection contractors during the development of the waste collection tender it was decided by Council that it would retain control of this aspect of the waste management program. Servicing capacity has also been evaluated and reviewed in order to accommodate the Council's proposed future waste strategy in relation to its waste facilities.

3.4.1.4 WASTE COLLECTION CHARGES

The pricing for a waste collection service was/is itemised separately on the rates notices. During the 2013/2014 financial year domestic customers paid \$145 for a weekly 240L waste collection service and commercial customers paid \$284. Generally speaking the commercial cleansing charge was more expensive due to the extra level of run in service provided to many commercial properties. However, this added level of service was identified as "not essential" and was removed from the latest waste collection contract. The waste industry norm is not to provide a commercial "run in" service and it was further recognised that this mechanism could be a way to reduce the waste cleansing charge to commercial businesses by reducing this particular aspect of their level of service.

The waste cleansing charge for a domestic service has been held at \$145 a year for a weekly general waste collection service for the 2014/2015 financial year. No Consumer Price Index (CPI) adjustment has been applied to this service this year. The waste cleansing charge for commercial business has been reduced by \$96 a year, with the 2014/2015 financial year commercial waste cleansing charge being only \$188 per service for the year.

3.4.1.5 DESIGNATED WASTE COLLECTION/SERVICE AREA

Until 1 July 2014 there had been three (3) separate waste collection contracts governing the old Murgon, Nanango and Wondai local government areas. Kingaroy was still under the day labour arrangements that were established under the then Kingaroy Shire Council. Each contract or day labour arrangement were different to each other. The new waste collection contract provided the opportunity to bring all of waste collection within the South Burnett into uniformity. The designated waste service area is shown in Appendix 5.

The designated waste collection area is a defined area, which under the local government legislation provides the mechanism whereby if a 240L wheelie bin waste collection service is provided within that area then that service is mandatory to the customer.

3.4.1.6 STREET AND PARK LITTER BINS

A number of different sized (cigarette butt bins to 20L waste bins through to 240L wheelie bins) waste container options are provided throughout the South Burnett, largely due to the individual decisions made by the previous local government administration prior to amalgamation. There presently is no public place recycling services provided.

The street litter bins are generally provided where high volume pedestrian traffic is encountered on sections of major streets in the main towns and villages throughout the South Burnett. Park bins are provided to Park localities on an as needed basis according to visitation and utilisation of these sites. Service areas and sites are monitored and reviewed, with changes being implemented where deemed necessary.

Street and Litter bins were serviced by a combination of day labour and contracted services.

South Burnett Regional Council reviewed the service level and delivery mode of the servicing of street and park litter bins as part of the new waste collection contract. Based upon the price tendered for street and park litter bins it was more cost effective for Council to retain serving these. By retaining street and litter bin collections it provides capacity for Council to respond to and clean up orphan illegal dumping incidents, roadside litter, inappropriate deposition of waste at unsupervised waste facilities, dead animal collection (Kingaroy only) and other essential waste collection services when necessary.

3.4.2 Waste Facilities - Current

The South Burnett Regional Council presently has seventeen (17) waste facilities. See Appendix 4 for Shire Map with location details.

There are no privately operated transfer stations or landfills in the South Burnett currently and there are no known plans for the establishment of any privately operated sites.

As South Burnett Regional Council is the only landfill provider within the South Burnett it is therefore charged with the responsibility to provide long term waste disposal capacity. It is therefore important to know the useful life of all the landfills within the region so that the long term waste disposal for the shire can be managed.

To be able to determine a life expectancy estimate for a landfill it involves calculating the remaining volume (available airspace) for that landfill area along with the rate or volume of waste being disposed of at that particular site.

It is important to note that this estimate is not a one off figure. A landfill life expectancy value requires continual future review and verification as these calculations will be impacted by any changes to the waste volumes going to landfill which could be caused by changes to the waste facility network, recycling efforts, waste avoidance & minimisation or reuse initiatives. This information then helps to develop what is known in the industry as a Closure Plan. A Closure Plan includes not only the useful landfill life information, but the final design profiles and ongoing monitoring arrangements.

Council currently has eight operating landfills. A number of these receive low volumes of waste and are provided for residential localised use only. It is important to review if this number of landfills is necessary as this type of facility can have a significant environmental footprint as well as high operating costs.

3.4.2.1 GENERAL SOUTH BURNETT WASTE DATA

The South Burnett Regional Council currently has a total of seventeen (17) waste facilities and only eight (8) of these sites have a landfill integrated into the site.

Is it estimated that approximately 19,244 tonnes of waste is disposed of to the eight (8) landfills located within the South Burnett Regional Council area, based on 2013 waste figures. This would equate to an estimated 590 kilograms of waste per person per year being disposed of to landfill within the South Burnett. This equates to approximately 11 kilograms per week or 1.6 kilograms per person per day of waste being generated for disposal.

Landfill Location	Brigooda	Cloyna	Durong	Hivesville	Kingaroy	Murgon	Nanango	Wondai	TOTAL
Estimates calculated on 2013 data	52	78	114	156	9,376	1,250	6,352	1,866	19,244
Licensed for tonnes/yr	50-2000	50-2000	50-2000	50-2000	5000- 10000	2000- 5000	5000- 10000	50-2000	
Landfill lifespan expectancy	1	5	5	1	15	15	15	14	
Proposed Future Use in the next 10 years	Transfer Station	Transfer Station	Transfer Station	Transfer Station	Continuing Landfill	Continuing Landfill	Continuing Landfill	Continuing Landfill	

Table 4: Estimated Landfill Disposal tonnages

Table 5: Estimated tonnages being removed from the various transfer stations throughout the South Burnett

Transfer Station Location	Proston	Homecreek	Chahpingah	Kumbia	Memerambi	Maidenwell	Blackbutt	Wattlecamp	Bunya Mountains	TOTAL
Estimates calculated on 2013 data	117	234	22	585	234	108	208	175	40	1,723
Landfill Destination	Wondai	Wondai	Kingaroy	Kingaroy	Kingaroy	Nanango	Nanango	Nanango/ Kingaroy	Nanango/ Kingaroy	

Note: These tonnages for the transfer stations have already been accounted for in the applicable landfill disposal figures in Table 4 above.

Townson

The Kingaroy Waste Facility had a weighbridge installed in the 2011/2012 financial year utilising state government funds from the short lived Waste Levy. This is the only site within the South Burnett jurisdiction to have a weighbridge.

The Kingaroy site is fully supervised, which enables better control of, security and capture of waste data. Of the total seventeen (17) waste facilities only four (4) of these waste facilities are supervised. A further two (2) are fully automated with keypad activated gates and surveillance cameras monitoring the entire site.

Waste data collected at the Kingaroy and Nanango sites is electronically captured and then transmitted for central storage at the Kingaroy Regional Office. Other sites capture waste disposal data based upon volumetric estimates. The active landfill areas at the four (4) major landfill sites are surveyed on a regular basis.

Туре		ionnes	Waste
Waste to	Waste collected from the kerbside 240L wheelie bins	9,000	29.91%
Landfill	Waste delivered directly to a disposal facility by domestic residents (Self Haul)	1,533	5.09%
Γ	Public Place	101	0.34%
L L	Construction and Demolition	6,438	21.39%
	Commercial and Industrial	2,231	7.41%
Γ	TOTAL WASTE TO LANDFILL	19,244	64.14%
Reuse and	Clean fill	3,750	12.46%
Recycling	Green Waste	7,000	23.26%
	Concrete	40	0.14%
	TOTAL REUSED or RECYLED	10,790	35.86%
	TOTAL WASTE & RESOURCE RECOVERY AMOUNTS	30,034	100%

Table 6: Estimate of Waste Source categorisation for 2013/2014

Construction and Demolition

Tuno

Segregated Construction and Demolition (C&D) waste including concrete, bricks and tiles is stockpiled at the Kingaroy Waste Facility. In the 2013/2014 financial year this stockpile of 6373m3 was crushed into reusable aggregate. This recycled aggregate is being sold commercially as well as being utilised internally by Council for drainage and road works (where applicable). The product must be stockpiled until a large amount is available in order to make it economically viable to bring in the mobile crushing units. This amount of construction waste/resource took some 10 years to accumulate. At other sites it is not feasible to stockpile this particular waste resource due to the small amounts received or lack of space available to stockpile. At sites where C&D is not stockpiled this waste is utilised, where possible, for the formation of the next new waste cell.

Page 15

% of Total

Green Waste

South Burnett Regional Council attempts to divert green waste from landfill. Green waste at the Kingaroy and Nanango waste facilities is stockpiled and turned into mulch, which is then provided free of charge to residents.

The economics of transforming green waste into mulch as a reusable resource is not viable at all waste facilities due to the volume of green waste received and in some case the remote locality.

A large mulching unit is required to be deployed in order to mulch the green waste material. The cost to mobilise this private plant is rather expensive and that is why Council first has to stockpile large quantities of the green waste before arranging to have it mulched. It is also a licence condition issued and administered by the State Government for some of our largest waste facilities that Council is not permitted to burn green waste.

The quality of the green waste mulch is rather low due to contamination of the green waste by residents. That is, residents do not generally bring in green waste free of any other contaminants. Residents put plastic, metal, polystyrene, cloth material, etc. in with their "green waste" loads hiding it beneath the bulk of the green waste. It is too costly to remove all of the contaminants. Council continues to encourage all contributors to the green waste stockpiles to ensure that they only bring in "clean" green waste. A summary of green waste volumes diverted from landfill is shown below.

Table 7: Estimated Green Waste volumes (m³) diverted from Landfill

Landfill Location	Blackbutt	Cloyna	Hivesville	Kingaroy	Murgon	Nanango	Wondai	TOTAL
Estimates volume (m ³)	9,000	3,000	5,000	68,000	12,000	18,000	9,000	124,000

Scrap Metal

Council provides for the recovery of scrap metal as a resource at sites where it is viable to collect this material from. A summary of estimated tonnages of this resource is provided below:

Table 8: Scrap metal recovery tonnage

Waste Facility Location	Brigooda	Cloyna	Durong	Hivesville	Kingaroy	Murgon	Proston	Wondai	TOTAL
Total net tonnage per year	6	45	24	71	681	182	29	100	1,138

The South Burnett Regional Council enters into Agreements with scrap metal companies from time to time for the removal of this resource from its various waste facilities. Council's call for quotes process from competitors within the scrap metal industry, prior to entering any Agreement, ensures that it maximises its return.

Batteries

Table 9: Tonnes of batteries recycled

Waste Facility Location	Kingaroy	Murgon	Wondai	TOTAL
Total tonnes recycled in 2013	5	0.25	0.073	5.323

The low tonnages experienced at the Wondai and Murgon waste facilities may be due to these sites being unsupervised and theft of this resource could be occurring. The batteries at the Nanango, Wattlecamp and Blackbutt waste facilities are still recycled, but are done so by the onsite contractors.

Waste Oil

Table 10: Estimated waste oil recovered

Waste Facility Loc	ation	Cloyna	Kingaroy	Murgon	Proston	Wondai	Blackbutt	Kumbia	Nanango	Memerambi	TOTAL
Total Litres recov per year	ered	800	10,400	800	750	2,000	3,200	3,400	3,100	700	25,150

The waste oil is collected and removed by a licensed regulated waste transport company. Approximately 25 tonnes or 25,000 L of waste oil is recycled or reused per year.

Agricultural Chemical Drums

The South Burnett Regional Council actively participates in the drumMUSTER program. drumMUSTER is a national product stewardship program that is supported by agvet chemical manufacturers, industry stakeholders (which includes member and farming associations), state and local governments. This worthwhile initiative continues to divert many plastic and steel agricultural chemical drums from landfill.

Council with the assistance of the drumMuster recycled 3,225 agricultural drums during the 2013/2014 financial year. This is drastically down on previous years and may be linked to the less than favourable weather and farming conditions experience during 2013/2014.

Council continues to encourage users of agricultural chemicals to avail themselves of this worthwhile and successful program. It is worthwhile to note that the disposal of the agricultural drums is at no further expense to the purchasers of these containers.

Table 11: Number of Agricultural Chemical Drums recovered and recycled

Financial Year	2005/06	2006/07	2007/08	2008/09	2009/10	2010/11	2011/12	2012/13	2013/14
Total number per year	6,351	2,963	5,106	9,187	10,417	5,682	14,209	8,843	3,325

Tyres

There is approximately 60 tonnes of tyres prevented from going to SBRC's Landfills per year. Tyres are deemed to be a "regulated waste" and their disposal must be tracked under the State Environment legislation. Tyres can only be freighted by a licensed regulate waste transporter to an approved disposal location.

Table 12: Types and number of tyres received at the various waste facilities within the South Burnett

Type of Tyre	Passenger	Light Truck	Truck	Other	With Rims	TOTAL
Total net tonnage per year	2,197	1,775	380	479	227	5,058

3.4.2.2 WASTE FACILITY SITE SPECIFIC DETAILS

The specifics of each waste facility site are as follows:

Waste Facility - Luck Ro KINGAROY			
Site Specifics	Site Management	Approved site use	Recycling facilities provided

3.4.3 Grease Trap and Liquid Waste Services

Grease Trap, Septic Tank and Oily Water Waste is presently disposed of at specific liquid waste disposal sites within the old designated Kingaroy, Nanango and Wondai Shire Council areas.

These particular waste streams are collected by private state licensed contractors in approved tankers. The South Burnett Regional Council has no involvement in the collection of this waste. Council merely provides a disposal service.

The present disposal solutions for liquid are not necessarily considered sustainable in the long term. The method of treatment and disposal that is in place presently was only designed to deal with small volumes and initially its focus was on septic tank waste. Environment and plumbing legislation in subsequent years required grease traps and oil separators to be fitted to certain commercial business premises so that greasy and oily water would not be discharged to the local government sewerage system. These other two liquid wastes, namely grease trap and oil water, subsequently needed to be disposed of and had to be accommodated within the existing or slightly modified liquid waste disposal systems. A multitude of rural residential subdivisions in the "recent" past throughout the South Burnett has also seen the volumes of septic tank waste increase.

Table 15: Estimated	I liquid wast	e disposa	l volumes
---------------------	---------------	-----------	-----------

Waste Facility Location	Oily Water	Grease Trap	Septic Tank	TOTAL
Total Mega Litres disposed of per year	112	777	929	1,818

3.5 LEGACY LANDFILLS

The South Burnett Regional Council has presently identified twenty two (22) old closed landfills, which had been operated by the previous local governments prior to amalgamation. See Appendix 2 for the locality map of the old closed landfill sites. These old landfills referred to as legacy landfills were closed many years before amalgamation, in fact most of them would have easily predated the *Environmental Protection Act 1994*.

There was little to no environmental licence conditions or state controls on these sites when they were closed or abandoned by the previous administrations. However, they are considered the responsibility of the South Burnett Regional Council. The Department of Environment and Heritage Protection (DEHP) is requiring that the South Burnett Regional Council ensure that these legacy sites are suitably covered over (i.e., capped) to make sure that they are not adversely impacting upon the surrounding environment.

The South Burnett Regional Council has submitted a draft timetable for the "restoration" of these old legacy waste disposal sites to DEHP See Appendix 3 for an outline of the proposed timeline for these legacy sites.

4 STRATEGY DEVELOPMENT

4.1 STRATEGY GOALS

The South Burnett Regional Council has reviewed its present Waste Management situation as well as the regulatory environment in which its waste services exists and has also proposed a preferred position for waste management into the future. This strategic waste management planning function is outlined in the following sections of this document.

Council has had to weigh up the pros and cons of the various possible strategic models moving forward along with the financial restrictions facing a small regional local government. Council believes that it has decided upon a measured and achievable compromise between waste management where cost is no limit and what is an affordable and practical level of service. The philosophy of continuous improvement has been an aspect of consideration during the waste planning process.

In order to move forward towards the new proposed waste management position a number of strategic goals have been developed based upon the abovementioned analysis, which has been strongly influenced by the level of service to be provided to the community.

4.2 LEVEL OF SERVICE

The South Burnett Regional Council has reviewed what its current level of service to the community is and how it can best continue to service the community's waste management needs and expectations. Defining a level of waste management service requires consideration of:

- Waste Collection [e.g, Will Council provide a kerbside collection service? If so, what waste collection service will it provide (waste only or recycling also or green waste as well)? What will be the type of waste collection container (bag, rigid box or 60L waste bin or 120L, 240L or 360L wheelie bin), frequency (how often will the service be provided?)]
- Resource Recovery and/or Waste Treatment [e.g., Is the collected waste resource going to undergo a resource recovery or treatment process prior to disposal (go through a Recycling Recovery Facility or a waste to energy plant)]
- Types of waste facilities and what services will be required at those waste facilities [e.g., Landfill, Transfer Station or Materials Recovery Facility. What degree, type of services or recycling opportunities will be supported at those sites?]
- Customer travel time to waste facilities
- Waste facility site supervision
- Waste facility opening hours

The higher order facets of waste management, namely waste avoidance, waste minimisation and reuse can impact upon a set level of service. Therefore, it is important to understand and decide what higher order waste hierarchy initiatives, if any, are going to be proactively introduced as part of any waste strategy and try to forecast how these will influence the established waste management practices and the types of waste to be managed.

4.3 WASTE REDUCTION & RESOURCE RECOVERY

4.3.1 Waste Hierarchy

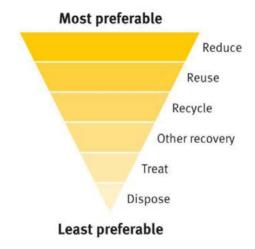

The concept of the "Waste Hierarchy" is internationally accepted. The Waste Hierarchy model outlines the preferred options for dealing with waste (see Figure 2 below).

Figure 2: Waste Hierarchy Model

The Queensland Government has taken this concept and expanded on it introducing the concept of the "Waste and Resource Management Hierarchy" in the state government's *Waste Reduction and Recycling Act 2011* (see Figure 3 below).

Figure 3: Queensland's Waste and Resource Management Hierarchy Model

The Waste and Resource Management Hierarchy espouses an additional step, namely treating the waste before disposal, which includes reducing the hazardous nature of waste. They have also separated Recycle and Recovery seeing them as separate steps in the process.

Each option within the hierarchy models is effectively ranked as to how favourable it is from an environmental perspective. The environmental expectation is that when considering waste management of any degree the first consideration must be to avoid the generation of this waste in the first place. If this not possible, the next choice is how can the generation of this waste be reduced or minimised. If this cannot be done, or there is still some residual waste, then the next decision is can the waste be reused. If after applying this concept there is still waste remaining can its value as a resource be recovered. That is, can it be recycled or utilised as an input to another process rather than disposed of as an output or can its inherent value be recognised some other way instead of just disposing of it (e.g. waste to energy). The treatment step as mentioned before may involve a process to make a waste substance less hazardous such as fixation so volatile leachable compounds within the waste are effectively bound up thus reducing the mobility of those previously hazardous substances. The final step in the Waste Hierarchy process is disposal.

The Waste Hierarchy has been a guiding principle throughout this strategic waste planning exercise.

The state government's *Waste Reduction and Recycling Act 2011* was mentioned earlier and one of the provisions under this Act is that all local governments must adopt a Waste Reduction and Recycling Plan. The production of this Waste Management Strategy document endeavours to also fulfil the requirements for a Waste Reduction and Recycling Plan. To this end, this publication should be construed to also be the South Burnett Regional Council's Waste Reduction and Recycling Plan.

4.3.2 Resource Recovery

The South Burnett Regional Council recently entered into a new kerbside waste collection contract, which commenced on 1 July 2014. Prior to this new waste collection contract the Council was operating under a mix of contract and day labour carried over from before amalgamation. The South Burnett Regional Council has been keen to have one system across the whole region.

The previous Nanango Shire Council Local Government area was the only local authority to have a kerbside recycling service via a split 240L wheelie bin system, which provided for both the disposal of general waste and the recovery of recyclable items such as aluminium and steel cans, plastic containers, paper and cardboard.

Research has shown that the contamination rate of split bins compared to a two bin system, where there is a separate bin for general waste and a separate bin for recyclables, is higher. Nanango's split bin recycling data is shown below.

Year	2008/2009	2009/2010	2010/2011	2011/2012	2012/2013	2013/2014	
Total Recyclables (tonnes)	334	309	258	286	294	363	
% Contamination	8%	11%	12%	11%	15%	6%	

Table 16: Nanango Split Bin Recycling Data by financial year (Tonnes)

Leading into the preparation for this present waste collection contract Council was keen to see kerbside recycling introduced across the South Burnett. The major drivers for a kerbside recycling collection was in order for Council to be able to:

- meet the State Government's waste reduction and recycling targets, whether under the old "Reduction and Recycling Strategy 2010–2020" or the new Queensland Waste Avoidance and Resource Productivity Strategy (2014–2024); and
- · implement sustainable waste management practices; and
- satisfy a key Community Plan outcome, namely to implement recycling initiatives throughout the region; and
- provide uniformity across the South Burnett Regional Council

If the South Burnett Regional Council was to have any hope in being able to meet the State Government's now voluntary waste reduction and recycling targets then kerbside recycling would need to be implemented.

A waste audit conducted in the South Burnett region in 2012 identified that almost half (48%) of the waste in a domestic wheelie bin placed out for collection contained recyclable items, including plastic bottles, aluminium cans, cardboard and paper. All of these products are able to be recycled.

Council had been informed, during consultation when developing the Community Plan, that recycling was a high priority for the Region. However, if Council was going to incorporate kerbside recycling as part of its new waste collection contract, this was going to be a major change for the South Burnett community. Therefore, Council believed that it was necessary to engage with the community in order to gauge their position on the matter. To this end, the South Burnett Regional Council undertook a survey of all residents who currently were provided with a kerbside waste collection service.

The kerbside collection survey included questions about a two bin recycling service (one for general waste and the other for recycling) and a three bin system incorporating an additional green waste collection.

About 40% of the 13,486 surveys were returned. This is an extremely high return rate considering that normally a good return rate would be around 10%. There was obviously a lot of interest from the community in this particular matter.

Of those who responded about 31% were interested in Council implementing a two (2) bin system (general refuse and recycling) while only 7% were interested in Council introducing a green waste service [three (3) bin system].

Although some residents responded with a 'no' to a kerbside recycling service [two (2) bin system], over two-thirds (68%) indicated that they would like a recycle bin, but were concerned about the cost of the service.

Based on this feedback Council cautiously went to tender requesting prices for a one (1) [general refuse only service] and a two (2) bin system [general refuse and recycling].

Council after great deliberation and consideration of the financial impost upon ratepayers as well as the present and future additional costs associated with a reduction in state and federal funding it was reluctantly decided not to proceed with kerbside recycling, at this time. Council has not decided indefinitely to not have a kerbside recycling service, but rather for now at least in the short term it will not be establishing a kerbside recycling collection.

Council has however committed itself to continue to explore the possibilities and options of expanding and/or introducing recycling opportunities at the various waste facilities across the South Burnett, in particular at least at the four major waste facilities of Kingaroy, Murgon, Nanango and Wondai. To this end, the South Burnett Regional Council continues to be in discussions with the Cherbourg Aboriginal Shire Council (CASC), who recently commissioned their own Material Recovery Facility (MRF).

The South Burnett Regional Council and CASC have entered into a Memorandum of Understanding (MoU), which seeks to outline the manner of responsibilities which the two parties would be accountable for in such a recycling partnership. Applications have been made under some funding opportunities, which if successful, would be able to assist the South Burnett Regional Council and CASC in moving closer to realising additional recycling options initially at South Burnett Regional Council's four major waste facilities.

It is also important to note that Council has already implemented a number of resource recovery initiatives at some of its waste facilities in order to minimise the amount of waste going to landfill. For example, construction and demolition waste is presently stockpiled at the Kingaroy waste facility, where it is eventually converted into recycled aggregate and able to be reused. Green waste is segregated at many landfills and diverted from being buried. The next extension to this activity is to try and improve the contamination rate experienced in the green waste stockpiles so that value adding activities such as composting can be undertaken and the final product sold. Batteries, waste motor oil, waste cooking oil, scrap metal and agricultural drums are other examples of existing resource recovery practices.

4.3.3 Waste Avoidance, Reduction & Reuse

As Council will presently not be implementing a kerbside recycling service in the short term the other aspect that it is now focusing is on is the higher level order principles of the Waste and Resource Management Hierarchy, namely Waste Avoidance, Waste Reduction and Reuse.

To this end, Council's waste management education program will be concentrating on resource conservation, waste minimisation and reuse strategies. Education campaigns will be targeted at the general community as well as to the business sector and the schools.

The South Burnett Regional Council will also be seeking to increase the community's participation in the "Recycle Shop" initiative. The existing model in Kingaroy seems to be working well and beneficial to all partner stakeholders. Therefore, Council will also be investigating the feasibility and community interest to establish additional recycle shop precincts throughout the South Burnett. The feedstock for such recycle shops will come from the local landfill(s) in the area where the new enterprises may be located.

4.4 WASTE FACILITY NETWORK PLANNING

Waste facilities represent a key part of the waste management system. The type, number and location of facilities will impact on the overall waste management cost and levels of service and therefore it is important to get the mix right.

Upon amalgamation the South Burnett Regional Council inherited a seventeen (17) existing waste facilities. An evaluation of the existing suite of waste facilities was necessary to determine if this inherited mix of waste facilities was right for the South Burnett (instead of what might have been acceptable to the other four local government areas prior to amalgamation) or whether a realignment was needed.

When planning for an efficient and cost effective waste facility network there are a number aspects to consider:

4.4.1 Travel Time to Waste and/or Recycling Facility

The generally accepted travel time service levels within the local government waste industry to a waste and/or recycling facility is:

- 80 per cent of the population within a 20 minute travel time to a facility; or
- 95 per cent of the population within a 30 minute travel time to a facility.

This level of service "standard" provides a guide to helping determine the appropriate number and location of waste facilities for a local government jurisdiction. This National guideline is also helpful in moderating community expectations. For example, everyone doesn't want to travel very far to go to a waste facility, but is that a reasonable expectation? If money wasn't a consideration perhaps this would not be such an issue. However, in local government resource constraints are a reality and so Council simply cannot provide a waste facility 5-10 minutes from every customer. It is just not practical or financially possible. This benchmark measure of travel time provides some rationale and robustness in the waste facility network planning process and well as providing a defence when waste facilities are identified as needing to close.

Each inherited waste facility has been mapped and the corresponding travel time calculated. This travel time is represented by a concentric circle around the waste facility locality. Each concentric circle signifies a 20 kilometre radii, which corresponds to an approximate 30 minute maximum travel time. The intention is to minimise the overlap of the concentric circles, while still endeavouring to provide enough locations that meet the expected service levels.

The South Burnett Regional Council's present waste facility coverage provides some 99.5% of the South Burnett properties with access to a waste facility with a travel time of not more than 30 minutes (See Appendix 6). This is a good outcome, however when looking at the coverage graphically there is some suggestion, because of the large amount of overlap, that perhaps the current mix of waste facilities is over servicing the South Burnett community.

The location of waste facilities must take account of population centres and geographical sub-regions. Designing the optimum transfer station network also requires alignment with landfill disposal sites, which may also need to be accessed by customers. This is therefore an ideal opportunity during the development of the waste management strategy to consider and design a future waste facility network suited specifically for the South Burnett.

The other side of the travel considerations to a waste facility is the travel distance required to transport/transfer the waste to its final processing or disposal destination. This aspect of the waste planning process is important to consider when determining is a certain site or locality the right place for a waste facility as well as deciding exactly what type of waste facility to be established.

4.4.2 Site Supervision

Waste management facilities by nature can expose people to health and safety risks. Inappropriate placement of waste at sites can render recycling materials unrecyclable, create additional safety risks as well as resulting in extra expense to clean up and dispose of the waste correctly.

Supervision of a site provides a greater degree of control and helps to reduce on site risks as well as ensuring that proper disposal practices occur. Ideally at least one person should be present while a waste facility is open.

Site supervision can also be achieved via automation and surveillance cameras, however this form of supervision is more of a passive control mechanism. It does not provide any direct control at the time, but its application provides for a retrospective response. It's a cheaper form of supervision in the medium to long term and enables a way of tracking and recording people's behaviours whilst on site. If they have done something inappropriate then Council can search back through the visual recordings and should be able to identify the perpetrator and follow them up for damages/costs.

Supervision does come at a cost, but this cost is offset by the beneficial outcomes and regulatory compliance achieved.

The South Burnett Regional Council presently has some four (4) of its waste facilities supervised by on site Contractors. There is no day labour staff presently utilised to supervise any waste facilities.

Council has two (2) of its waste facilities fully automated with camera surveillance.

4.4.3 Optimal Operating Days/Hours

Historically waste facilities have generally over-serviced communities with many examples of facilities being available 24 hrs, 7 days a week. Given environmental licensing requirements to secure, only receive certain waste for disposal and to adequately supervise waste disposal activities Council must consider the operating costs for all sites.

Council needs to find a balance between hours that its waste facilities are open and what level of supervision is provided against the competing demand for compliance with state licensing conditions, under which Council is legally bound to adhere to. The desired result is to provide opening days and hours applicable to the usage the facility receives.

Another generally accepted local government waste industry benchmark is for sites which predominately have residential clients having less than 5,000 visitors per year to be open for approximately 12 hours per week. This provides normally for the waste facility sites to be open for a half day on Saturday and Sunday and another half day during the week sometime. Waste facility sites in excess of 5,000 visitors per year are assessed on an individual basis.

4.4.4 Type of Facilities and Services

A waste facility can be anything from a:

- landfill (simple rural trench design to a large lined best practice landfill);
- transfer station (ranging from a simple 2 or 3m³ bulk waste bin enclosure to a 10 or 27m³ skip bin walled structure or up to a large facility that can take bulk commercial waste and has the capability to load and compact the waste into a long haul transport vehicle/trailer);
- resource recovery facility (where the separation and processing of collected recyclables is carried out), some other resource recovery facility (such as a waste to energy plant) to a;
- waste treatment facility (e.g. fixation or composting).

The South Burnett Regional Council has an abundance of transfer stations and landfills and the intention is to progressively close the minor landfills and utilise transfer stations and transition to the larger regional landfills and ultimately one super landfill, which will service all of the South Burnett. By eventually only having one landfill there would be associated operating cost savings. This transition to one super landfill however will take up to fifteen (15) years plus to achieve.

Landfills are strategic assets with defined lives, identified by well researched and calculated Closure Plans. The defined life of a particular landfill can be increased through the landfill owner's ability to influence an increase in recycling and/or a reduction in the amount of waste going to landfill.

It is the available airspace capacity within a landfill that has the intrinsic value associated with the asset, not the landfill infrastructure or the buried waste, unless electricity generation from gas production is involved/considered.

Landfill sites operate under a state issued "environmental registration/licence", which includes operational requirements and specifies a cap on the volume of waste that is permitted to be disposed of at a particular landfill per year.

The approval process for a new landfill is extremely protracted and difficult. One of the major considerations when endeavouring to establish a new landfill is trying to find a suitable location due to strict environmental and planning requirements and local community resistance. This places great importance on maximising the life of existing landfill assets. Landfill site selection, acquisition, planning, approval and development can take anywhere from 7 to 10 years. Therefore any moves to identify a new site will require a long lead time prior to the site being established. Poorly located or operated landfills can be a liability due to significant site management and compliance costs.

Closed landfills can also represent a financial liability where closure requirements are not planned and where costs and ongoing monitoring have not been considered and funded. It is necessary to factor in whole of life costs when calculating the cost to establish and operate a new landfill. These costs must be incorporated into the waste disposal charges for the landfill.

A common misconception in the community is that new waste treatment technologies will remove the need for landfill. There are no examples of resource recovery processing plants or alternative waste treatment technologies present or emerging on the known horizon which remove the need for landfill all together. These abovementioned technologies may reduce the volume of waste needing to be landfilled, but there is still a percentage of waste outputs that still need to be landfilled.

4.4.4.1.1 Transfer Stations

A waste transfer station exists to:

- · amalgamate smaller loads of waste into larger more efficient loads for transfer off-site;
- provide a safer customer interface alternative than a landfill;
- provide customers with a permanent waste "disposal" site, which has less of an environmental footprint and price tag (capital and operational) compared with a landfill; and
- provide opportunity for the collection of reusable and recyclable items.

Transfer stations are long term waste management assets, generally being located within a clearly defined user catchment area.

Any prospective new transfer station site should allow for sufficient space and be designed with some flexibility in mind in order to permit the site to be developed and change over time as the community grows or waste management practices and solutions change.

Major transfer stations are considered to be those facilities that will accept large volume waste from small vehicles and large vehicles such as waste collection compactor trucks. Generally this includes the transaction of large commercial vehicles on a price per tonne basis and weighbridge installation is common at these sites. These large transfer stations also generally accept waste and recyclables from domestic and commercial customers. The design of these major transfer stations usually incorporates machinery to push/load waste into large transfer vehicles.

Minor transfer stations are facilities that only accept domestic and smaller commercial vehicles, generally vehicles up to 4.5 tonne gross vehicle mass (GVM).

Small transfer stations are facilities that only accept waste from domestic sources/vehicles.

It is unlikely that weighbridges will be provided at minor and small transfer stations due to the associated capital and operational costs. At sites where no weighbridge exists waste disposal is estimated/calculated as a price per cubic metre (m3). The weight of waste removed from a transfer station is normally captured at the landfill, particularly where a weighbridge is installed.

There are many different transfer station designs around, but generally speaking all of the designs can be summarised into two types of facility designs. One design allows for waste to be deposited by the customer directly into a waste bin or the other sort provides for the waste to be deposited onto a floor area for sorting prior to loading and transfer.

4.4.4.1.2 Resource Recovery

Customers self-transporting waste typically need recycling facilities for green waste, steel, cardboard, reusable items, oil, batteries, construction and demolition waste and household hazardous waste. These recycling facilities may be ideally located at and existing transfer station or landfill waste facility site.

There are also dedicated Material Recovery Facilities (MRF's) where kerbside collected recyclables are sorted and consolidated for sending to markets. These entities are large enough in their own right to be located on a site specific to and expressly suited to this type of activity.

Some Councils also have designated organic and/or green waste processing and composting sites, which due to their potential for odour issues need to be located appropriately.

Construction and demolition waste sorting facilities where items including concrete, timber and steel are segregated and processed or consolidated for sending to markets is another example of a resource recovery activity that can be site specific.

Federal legislation is attempting to facilitate an increased collection and reprocessing of some types of waste such as used e-waste (computers and TV's). However, South Burnett Regional Council's experience to date with this particular initiative is that private contractors focus exclusively on the larger populated centres. South Burnett Regional Council will continue to adopt a watching brief of these types of programs and will endeavour to participate where able and viable to do so.

Mature markets exist for many recyclable items (e.g., scrap steel, plastic, cardboard and paper, waste oil and batteries), but the only ones that seem to be economically viable in a regionally distance challenged and smaller local government situation, such the South Burnett, are scrap steel, waste oil and batteries.

4.4.4.1.3 Waste Treatment Facility

Waste treatment facilities such as composting and incineration and fixation for hazardous waste substances and alternative waste treatment technologies (e.g., waste to energy) normally require a large feedstock or a large critical mass in order for them to be economically viable. In regional Queensland unfortunately there is not the population base sufficient to support such initiatives presently.

There has been some promising suggestions from the waste to energy industry to modularise the concept on a small scale so that small to medium sized communities could potentially access this sort of waste treatment system. The price tag is still predicted to be extremely high and there are no functioning or working prototypes of waste to energy plants servicing the needs of small local government as yet. So, unfortunately the South Burnett Regional Council's position on this particular matter continues to be a watching brief. The waste management strategy however has been developed with some degree of flexibility so that if and when such technology becomes available to regional local governments that Council has the ability to modify its existing infrastructure to take advantage of waste technology advances.

5 SOUTH BURNETT REGIONAL COUNCIL'S STRATEGY

The waste planning process has established a number of key strategic goals for the waste management area. A number of critical actions have subsequently been identified, which need to be completed in order for these strategic goals to be achieved. The required actions listings also contain items of legislative compliance or key areas needing to be managed. Each of these action items has been prioritised and a proposed timeline allocated. There are six (6) Strategy Goals as outlined below:

5.1 WASTE AVOIDANCE, MINIMISATION AND REUSE

Strategy Goal 1 – Provide Community Waste Education.

Description	Provide waste avoidance, minimisation and resource recovery education services designed to increase awareness of resource conservation, diversion of waste away from landfill and recycling opportunities.
	Provide information to the community about the various waste facilities and what services are available.

The success of achieving good waste management outcomes is heavily reliant on the users being informed and educated about how they can actively choose to avoid generating waste and what resource recovery options are available to them. Customers need to know how the various waste facilities operate and what they need to do in order to access those facilities. Education of householders and business operators is therefore a key component of any waste management program.

The proposed education program will target:

Households

Householders require information and advice about how the South Burnett Regional Council's waste management systems operate including collection services, how and where to dispose of unwanted items and how to segregate items for disposal at facilities. Other general information will include details about home composting, worm farming, waste avoidance, reuse and recycling.

Schools

Teachers and students are a key component for waste education. It is anticipated that the waste education program will include a general waste management information brochure, a teacher resource kit, a student information kit and other "In school" waste education materials about sustainable waste management.

Businesses

Business and industry will require specific information about the services available in the region. The industry specific education program should include advice and support on:

- How the various waste facilities operate and what they need to do to access those facilities
- Cleaner production
- Government support programs
- Optional waste audits and waste reduction/recycling advice.

Community activities and organisations

Council takes a role in the public clean-up campaigns, which are promoted from time to time. The most popular of these is the Clean-Up Australia campaign, which is run annually. The focus of these campaigns is community participation and environmental awareness rather than waste diversion. The education role is extended to other community organisations to provide information and advice as required.

Actions Required		By When	Measures and Targets	
1.1	Deliver a Community Waste Education Program	Commence by 30 June 2015	Community members including residents, schools, businesses and community groups have access to waste education resources that provide advice and assistance to enable informed decisions to be made about improving waste management practices and performance within the South Burnett.	

5.2 WASTE COLLECTION SERVICES

Strategy Goal 2 – Provide cost effective, environmentally responsible & efficient waste collection operations.

Description Waste collection services shall be value for money, operated efficiently and have minimal (to no impact) upon the environment.

The collection of general waste within the South Burnett, via a kerbside 240L wheelie bin, is now delivered under one contract. The contract commenced on 01/07/2014 and expires on 02/07/2022. This expiry date is similar for other Wide Bay Burnett Regional Organisation of Councils Inc (WBBROC) in order to facilitate the possibility of one large region wide collection contract in the 2022/2023 financial year. Discussions on the possibility of such a region wide arrangement are continuing. A decision on whether the WBBROC member Councils wish to proceed with a joint region wide waste collection contract will need to be made by mid 2019 (see section 3.4.1.1 240L WHEELIE BIN WASTE COLLECTION for detailed explanation of the preparation timeframes).

Action	ns Required	Timeframe	Measures and Targets
2.1	Establish one waste collection contract for the whole South Burnett for the kerbside collection of general waste via a 240L wheelie bin to domestic and commercial clients within the designated waste collection areas. Provide an option for kerbside recycling also, which will be implemented subject to cost and community desire and capacity to pay. Ensure that the waste collection vehicles meet best practice emissions standards.	Before 30 June 2014	Completed
2.2	Manage the new waste collection contract.	Ongoing	Collection services are delivered in accordance with contract terms and conditions.
2.3	Commence arrangements to establish the next waste collection contract not less than three years prior to the expiry of the existing contract.	Medium Term	Continue to contribute to the Waste and recycling Advisory Committee (WRAC) in the Wide Bay Burnett Regional Organisation of Councils Inc. (WBBROC) with a view to helping to facilitate a decision as to whether or not WBBROC and the South Burnett Regional Council should proceed with a region wide waste collection contract by no later than mid 2019. If WBBROC does not proceed with the development of a region wide waste collection contract then the South Burnett Regional Council shall commence its own arrangements to prepare for its next waste collection contract.

5.3 WASTE TRANSFER AND DISPOSAL FACILITIES

Strategy Goal 3 - Provide an appropriate network of waste transfer and disposal facilities

Description	Determine locations for transfer stations and landfills that provide customer access arrangements	
Description	for the required service levels.	

Some changes will need to be made to the existing waste facility network. See Council's proposed Waste Management capital works program in Appendix 7.

Actions Required By		By When	Measures and Targets	
3.1	Ensure that the generally accepted industry best practice service level for access to a waste facility is applied within the South Burnett.	Short Term	Less than 5% of properties will have to travel more than thirty (30) minutes in order to access a waste facility.	
3.2	Establish a transfer station at the following waste facilities: Hivesville Brigooda Durong Cloyna	Short Term	To be installed by 30/6/2015.	
3.3	Investigate possible alternative locations for the existing Maidenwell Transfer Station. If a suitable site is found then establish a new transfer station at this new location and close the existing site.	Short Term	Initial investigation to be undertaken by 30/6/2015.	
3.4	Upgrade the Wattlecamp transfer station	Short Term	To be installed by 30/6/2015.	
3.5	Establish the Nanango Waste facility transfer station	Medium Term	To be installed by 30/6/2020.	
3.6	Extend the current Kingaroy transfer station (subject to demand).	Long Term	To be installed by 30/6/2021.	

Strategy Goal 4 - Provide responsible management of waste facilities

Description

ion responsible manner which also meets customer expectations in relation to service quality, cost, recycling and waste reduction opportunities.

Provide waste facilities that are well designed and operated in an efficient and environmentally

In order for the efficient and environmentally responsible management of Council's waste facilities some landfill sites will close.

The capture of waste data at all sites needs to be improved for reporting purposes and to ensure that any future decisions in relation to the waste facilities are well informed.

Waste facilities by nature can expose people to health and safety risks. Also, inappropriate placement of wastes can increase operational costs. Appropriate supervision of site activities is preferred and shown to reduce risks and to ensure proper disposal practices occur. Council will regularly review all waste facility operations for appropriate levels of supervision and security and where feasible sites will be supervised when open.

Old Closed legacy landfills will need to be appropriately rehabilitated.

Actio	ns Required	By When	Measures and Targets	
4.1	Effectively close and cap the following rural trench landfills when they have reached their maximum capacity: Hivesville Brigooda	Short Term	Carry out closure, capping and rehabilitation works.	
4.2	Effectively close and cap the following rural trench landfills once a transfer station is operational: Durong Cloyna	Short Term	Carry out closure, capping and rehabilitation works.	
4.3	Regularly review the opening days and hours of all waste management facilities.	Short Term	Opening times shall be determined subject to site user access volumes, type of waste(s) received, local community expectations and financial operating constraints.	
4.4	Review all waste facilities for appropriate levels of supervision and security.	Short Term	Where feasible waste facilities are to be supervised when open.	
4.5	Continue to rehabilitate old closed legacy landfills as per the proposed timetable for restoration of old legacy landfills (see Appendix 3)	Long Term	Rehabilitating the old closed legacy landfills in accordance with the proposed time schedule.	
4.6	Implement processes to identify and capture waste data for all waste disposed of at Council waste disposal sites as per state legislative requirement.	Short Term	The necessary waste data required from all applicable Council waste facilities is captured, quantified and reported to the state government as stipulated.	
4.7	Install wind barriers to the following transfer stations: Kumbia Home creek	Long Term	Install wind barriers by 2020/2021.	
4.0	Provide alternative disposal solutions for	Short Torr	Establish provision for the new Sewerage Treatment Plant to deal with grease trap and septic tank waste.	
4.8	grease trap, septic and oily water liquid wastes.	Short Term	Establish infrastructure to be able to store oily water, which will then be transported for final processing/disposal at an approved treatment facility.	

Strategy Goal 5 - Provide landfill air space to meet the regions long term waste disposal needs

	Investigate what feasible options exist for future waste disposal for the waste needs of the South Burnett beyond the next 15 years.
Description	As landfilling will most likely be a part of the total waste disposal solution then identify (potential) landfills outside of the South Burnett or potential landfill sites within the South Burnett.
	Cause adequate landfill capacity to be developed and maintained in order to continue to provide for the waste demands of the South Burnett.

Future availability of landfill airspace is crucial for continued region sustainability and growth. It is important to have a minimum volume of approved landfill airspace available at all times. As a guide the South Burnett Regional Council should be endeavouring to maintain fifteen years of approved waste disposal capacity, which includes long term contracts for access to landfill air space or adequate and suitable land holdings for landfilling, appropriate state government approvals/licences in place and satisfactory levels of funding for the development of the required waste disposal cells.

Action	ns Required	By When	Measures and Targets
5.1	Continue discussions with the Wide Bay Burnett Regional Organisation of Councils Inc (WBBROC) in relation to the possibility of a combined regional waste disposal facility for member Councils in the Wide Bay Burnett area.	Short Term	A decision is reached as to whether it is in the South Burnett Regional Council's best interests to pursue a combined arrangement within the next two years.
5.2	 Investigate the long term waste disposal options for the region including: Options to extend the four major landfills, namely Kingaroy, Murgon, Nanango and Wondai Establishing a major transfer station within the South Burnett in order to bulk up waste for transport and disposal outside of the South Burnett region. Establishing a new major regional landfill within the South Burnett Alternative Waste Treatment Technologies (e.g. Waste to energy) Identify possible existing or proposed landfill sites outside of the South Burnett (possibly within adjoining Council areas) who would be interested in receiving waste from the South Burnett and entering into a long term waste disposal arrangement/contract. 	Short to Medium term	A minimum of fifteen (15) years of approved access to landfill air space to be maintained at all times. Determine which is the most cost effective and provides the most benefit to either continue to provide landfilling within the South Burnett or to transport waste to another shire for disposal.

5.4 RESOURCE RECOVERY

Strategy Goal 6 - Provide opportunities to reduce waste to landfill

Council will continue to provide alternatives to landfilling.

Description Council will also investigate ways of expanding existing resource recovery activities, while also seeking to introduce new landfill diversion initiatives.

Waste Transfer Stations and Landfills - General Recycling

Investigate the feasibility of being able to expand the recycling services presently provided at all of Council's Waste facilities, most particularly at the four major waste facilities of Kingaroy, Murgon, Nanango and Wondai.

Kerbside Recycling

Council shall periodically review its decision to not implement a kerbside 240L fortnightly recycling service. Should circumstances substantially change such that it becomes appropriate/necessary then the decision relating to kerbside recycling will be reconsidered.

Green Waste

Green waste is garden waste such as grass clippings or cuttings and pruning's from trees, shrubs and other vegetation.

Council presently segregates green waste from landfill. Green waste at major Council waste facilities is mulched for reuse, while small green waste stockpiles at some of Council's waste facilities are still permitted to be burned.

Mulch, which is processed green waste, is reliant on local or regional markets for reuse. One of the major restrictions in being able to provide a commercially competitive mulch product is because of the level of contamination presently experienced due to users of waste facilities not adequately separating their green waste and keeping other waste items out of the green waste stockpile. If the green waste feedstock could be kept clean then Council could realistically charge for the mulch product or it could value add (i.e., compost the mulched product) to realise a greater revenue for the sale of this higher end product.

Recycle Shop

The South Burnett Regional Council partners with a local community group to provide a recycle Shop in Kingaroy. Items which still have some value are able to be diverted from landfill and resold back to the community. It is Council's intention to expand the present Recycle Shop model to other areas within the South Burnett.

Community Education

Council's waste education program targets the diversion of organic waste through home composting or worm farming. Residents and businesses will also be encouraged to try and avoid generating the waste in the first place through requesting them to think about how they purchase items and whether packaging can be minimised, eliminated or reused.

The Community Education program also seeks to promote the resource recovery opportunities that exist at the Council's waste facilities.

Construction and Demolition Waste (C&D)

This waste type generally includes concrete, bricks, tiles, timber, soils, sand and metal. Provision is presently made at certain waste facilities for segregated C&D waste to be stockpiled and when there is a sufficient amount a contractor comes and pulverises the C&D waste into recycled aggregate for reuse, internally and externally.

Actions Required		By When	Measures and Targets
6.1	Investigate the feasibility of being able to expand the recycling services presently provided at all of Council's Waste facilities, most particularly at the four major waste facilities of Kingaroy, Murgon, Nanango and Wondai.	Short term	Residents and businesses have access to waste facilities that accept clean separated reusable and recyclable items.
6.2	Periodically review if kerbside recycling should be introduced.	Medium Term	If circumstances substantially change Council will reconsider its kerbside recycling decision.

6.3	Continue to divert green waste from landfill and where necessary and/or practicable to recycle it. Investigate and where appropriate implement measures to improve the cleanness of green waste coming into the Council's Waste facilities for recycling. If green waste levels of contamination can be reduced to an acceptable level, investigate the feasibility of value adding (i.e., composting) to the mulched green waste product in order to make a commercially saleable compost product.	Short Term	Green waste stockpiles at the various Council waste facilities are "clean". Investigate the feasibility of composting the clean green waste within the South Burnett
6.4	Continue with the current Recycle Shop in Kingaroy. Ascertain the interest in and feasibility of establishing other Recycle Shops within the South Burnett.	Short term	If adequate interest and support exists then proceed to establish additional Recycle Shops at appropriate locations in the South Burnett.
6.5	Organic waste diverted from the 240L general waste disposal wheelie bin to home composting or domestic worm farms.	Medium to long term	A reduction in the volume of organic waste being deposited in the 240L general waste disposal wheelie bin on the 2012 waste audit data.
6.6	Continue to provide for the recycling/reuse of construction and demolition waste.	Ongoing	Construction and demolition waste is diverted from landfill, where practicable.
6.7	Continue to adopt a watching brief on alternative technologies to see if any of these developments can be incorporated into the South Burnett Regional Council waste management program.	Ongoing	Regularly review the latest developments in the alternative waste management industry to see if any of the processes can be applied to waste management in the South Burnett.

SOUTH BURNETT REGIONAL COUNCIL

5.5 SUMMARY OF STRATEGY GOALS AND ACTION PLAN

Str	Strategy Goal	Action	Actions Required	By When
1	Provide community waste education.	1.1	Deliver a Community Waste Education Program	Commence by 30 June 2015
	Provide cost effective, safe,		Establish one waste collection contract for the whole South Burnett for the kerbside collection of general waste via a 240L wheelie bin to domestic and commercial clients within the designated waste collection areas.	
3	environmentally responsible & efficient waste collection operations.	2.1	Provide an option for kerbside recycling also, which will be implemented subject to cost and community desire and capacity to pay.	Completed
			Ensure that the waste collection vehicles meet best practice emissions standards.	
		2.2	Manage the new waste collection contract.	Ongoing
		2.3	Commence arrangements to establish the next waste collection contract not less than three years prior to the expiry of the existing contract.	Medium Term
		3.1	Ensure that the generally accepted industry best practice service level for access to a waste facility is applied within the South Burnett.	Short Term
	Provide an appropriate	3.2	Establish a transfer station at the following waste facilities: Hivesville Brigooda Durong Cloyna	Short Term
3	network of waste transfer and disposal facilities.		Investigate possible alternative locations for the existing Maidenwell Transfer Station.	E E
		3.3	If a suitable site is found then establish a new transfer station at this new location and close the existing site.	Short lerm
		3.4	Upgrade the Wattlecamp transfer station	Short Term
		3.5	Establish the Nanango Waste facility transfer station	Medium Term
		3.6	Extend the current Kingaroy transfer station (subject to demand).	Long Term

6 STRATEGY IMPLEMENTATION

The South Burnett Regional Council's Waste Management Plan has provided six strategic goals along with a number of action items in order to achieve the Council's vision for waste management into the future.

The timeframes for implementation of the action items is provided in section 5.5 of this strategic document.

7 STRATEGY CONSULTATION

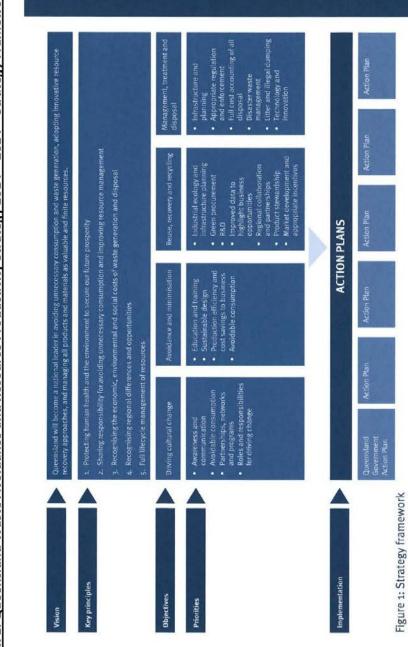

This Waste Management Strategy had been open to public comment for a minimum period of 28 days. All feedback and comments that were received from this consultation period were considered in order to develop this final version of the Waste Management Strategy.

Summary

Finance and Planning Portfolio Report to Council.

Officer's Recommendation

That the Finance and Planning Portfolio Report to Council be received.

Resolution:

Moved Cr KM Campbell, seconded Cr RLA Heit.

That the Finance and Planning Portfolio Report to Council be received.

Finance

Financial Report to 30 April 2015.

The Financial Ratios, particularly Cash and Operating Cash, are within reasonable parameters having made adjustments for the level of restricted cash. As mentioned at the last Council meeting the Operating Cash and Funded Long Term Liabilities results are influenced by the estimated Restricted Cash as at 30 June 2014. Restricted cash relates to funds like unspent

grants at year end, unspent loan funds and developer contributions. These funds are used during the year as the particular funded projects progress. Delivery of the fourth quarter rates started on the 11th of May with 15th of June as the discount date

With regard to the Comprehensive Income Statement:

The line items are trending as expected with the actual expenditure now compared to the proposed budget which is before Council today for consideration and adoption. The only items to note and which will require further analysis are the Finance Costs which is low compared to the percentage of year expired and Depreciation Expense which as yet has not been adjusted as a result to the asset revaluations undertaken by APV effective from 1 July 2014. The impact of that is still being considered in conjunction with the external auditor and APV.

Capital Program

• The Capital Program is progressing well with that budget to be reviewed at the next Council Meeting.

2015 - 2016 Budget Development

The draft Operating Budget for 2015 - 2016 for General Operations has been reviewed by Councillors. The Waste, Waste Water and Water Operations budgets will be reviewed by Councillors this afternoon. Although the Capital Budgets have been completed they will be also be available for review at the meeting this afternoon if required. If Councillors agree to the Draft Budgets, work will commence on preparing the formal budget documents in readiness for the Budget Meeting which is currently scheduled for 29 June 2015.

Third Quarter Operational Budget Review

The report for the third quarter operating budget review is before Council. The main changes compared to the previous 6 months review are in General Operations, Waste Operations and the NDRRA (Flood Recovery) Program.

General Operations:

• This result is influenced by a variety of increases and decreases to line items within General Operations.

Waste Operations:

• The main influence in this operating result is due to an unplanned increase in commercial tipping charges. This is expected to be a one off result and will not flow into future years.

Planning

Glendon Street Carpark –To date Infrastructure completed a detailed survey of the carpark for roads and drainage to assist with the design and propose to include the work on the capital works budget for future completion. As reported at the last Council Meeting the work for is estimated to be 170,000.

Memerambi – A full report will be presented to the 3^{rd} June Council Meeting which will demonstrate the outcome of the Infrastructure Agreement forwarded to property holders. In addition, our Lawyer has been invited to address Council before 3^{rd} June to explain the implications of the process to progress the development.

New Planning Scheme – As of today we have not received the official response from the new Deputy Premier and Minister for Local Government, Jackie Trad. The Department's response to Council's enquiry indicates that the Department hopes to have an answer soon. Once the official response is provided Council can proceed with the public display of the New Planning Scheme and conduct the community consultation program that has been proposed to be held at various Libraries throughout the SBRC.

Local Heritage Register – While it is a requirement under the QLD Heritage Act for Council to compile and maintain a Local Heritage Register there are a number of deliverables that will result

from the study and for which money has been allocated in the 2015/2016 budget. Council Manager Planning will support the study by providing technical support and knowledge of the current heritage listed places and supporting the one-on-one consultation with landowners. The outcomes of the study will also provide further input for the development of a local heritage trail which is to be developed as part of Council's tourism projects.

- A list of identified places including justification of the places significance and results of the one-on-one consultation with the owners of the places on the proposed list.
- A place card for each place provided a detailed description of the place, it's heritage significance, GPS coordinates and photo's.
- Two workshops with Councillors and a final presentation of the study results.
- Heritage map layer identifying the boundaries of listed places for inclusion in Council's digital Cadastral Database.
- Access database that includes the information of each listed place.

Statistics – The attached table provides an update on the number of applications received to date. Numbers are still relatively low which is not unexpected given the depressed local economy.

10.1.3 F - 1452087 - 2015 Budget Revision

Summary

A review of the 2015 Budget has been undertaken as at 31 March 2015. The Operational Budget forecasts a net operating surplus of \$7,330,477.

The tables below show the projected changes compared to original budget for each of relevant operations functions of Council.

Operational Budget

Program	Original Budget Result \$	Half Year Result \$	Three Quarterly Result \$
General Operations	(\$165,095)	(\$58,481)	(\$334,342)
Plant & Fleet	\$852,245	\$698,960	\$698,960
Water	(\$182,273)	(\$182,273)	(\$182,273)
Waste Water	\$91,525	\$91,525	\$91,525
Waste	\$65,275	\$65,275	\$224,507
NDRRA	(\$2,300,000)	(\$2,300,000)	\$2,100,000
Result from Operations	(\$1,638,323)	(\$1,684,894)	\$2,598,377
Net Operating Surplus	\$11,974,284	\$3,567,713	\$7,330,477

A projection of Councils operating result (excluding flood restoration works) is as follows:

Program	Original Budget Result	Half Year Result	Three Quarterly Result
General Operations	(\$165,095)	(\$58,381)	(\$334,342)
Plant & Fleet	\$852,245	\$698,960	\$698,960
Water	(\$182,273)	(\$182,273)	(\$182,273)
Waste Water	\$91,525	\$91,525	\$91,525
Waste Management	\$65,275	\$65,275	\$224,507
Total Surplus	\$156,800.00	\$156,800.00	\$498,377

Adjustments have been made in:

Operating Revenue:

- Fees and Charges,
- NDRRA Revenue

Capital Revenue:

• Grants, Subsidies, Contributions and Donations, mainly related to the timing of the receipt of funds for major projects.

Expenditure

- Materials and Services,
- NDRRA Expenditure

The proposed amendments do not significantly change the focus of the overall budget as forecast in July 2014.

Officer's Recommendation

That in accordance with Section 170(3) of the Local Government Regulation 2012 the revised Budget to 30 June 2015 be adopted.

10.2 Planning (P&LM)

Officer's Reports

10.2.1 P&LM - 1445105 - Forwarding Reduction in Council Fees Application for Storage Shed at Wondai Sportsground - waiver of fees - BLD2015/0061

Summary

Council received a written request from the Wondai District Cricket Club Inc for a 100% waiver of the Building Application Fee. The application is for a Storage Shed at the Wondai Sports Grounds located at 14064 Bunya Highway, Wondai (and described as Lot 156 on FY809991). The details are as follows:

- The Wondai District Cricket Club intend building a Storage Shed at the Wondai Sports Grounds.
- The Storage Building is for the 5 current non for profit/community groups that are using the facilities.
- A permanent shaded structure is to be used by juniors, seniors and spectators whilst various sports are being played on the second oval of the Sports Grounds.

Officer's Recommendation

That Council *approve* 100% the waiver of the Building Application Fee \$405.00 taking into consideration the community nature of the Wondai Sports Ground. Based on previous decisions by Council in these matters, it is considered appropriate to retain the document lodgement fee (\$168.00) associated with the Building Work applications.

Resolution:

Moved Cr KM Campbell, seconded Cr DJ Palmer.

That the Officer's Recommendation be adopted

Carried 7/0 FOR VOTE - Councillors voted unanimously

10.2.2 P&LM - 1443993 - Forwarding Reduction in Council Fees Application for construction of shed at Blackbutt Showgrounds and requesting waiver of building application and inspection fees - BLD2015/0063

Summary

Council received a written request from the Bloomin Beautiful Blackbutt Festival for the waiver of the Building Application Fee and Inspection Fee. The application is for a Storage Shed to be constructed at Blackbutt Showgrounds located at Hart Street, Blackbutt (and described as Lot 174 on CA311082) for storage of equipment, files and other items to assist in the annual Bloomin Beautiful Blackbutt Festival.

Officer's Recommendation

That Council *approve* 100% the waiver of the Building Application Fee \$405.00, taking into consideration the community nature of the Bloomin Beautiful Blackbutt Festival. Based on previous decisions by Council in these matters, it is considered appropriate to retain the document lodgement fee (\$168.00) associated with the Building Work application.

Resolution:

Moved Cr DJ Palmer, seconded Cr KM Campbell.

That the Officer's Recommendation be adopted

Carried 7/0 FOR VOTE - Councillors voted unanimously

10.2.3 P&LM - 1424013 - Forwarding IDAS Application Material Change of Use (Medical centre) - 183-189 Haly Street, Kingaroy - Lot 16 SP225635 Applicant: Midland International Pty Ltd C/- Blueprint Drafting Services

Summary

Key Point Summary

- Application for a Medical Centre which falls within the Commercial Use Class under the Planning Scheme;
- Proposed location is vacant shops in the Business & Commercial Zone with Preferred Land Use of Core Business & Commercial;
- Assessable against the Urban Locality Code and Community Facility Overlay Code;
- Application recommended for approval subject to reasonable and relevant conditions.

Officer's Recommendation

That Council *approve* the Development Application for Material Change of Use (Medical Centre) at 183-189 Haly Street, Kingaroy (and described as Lot 16 on SP225635), subject to the following conditions:

General

GEN1. The subject site is to be developed generally in accordance with the plans and information submitted with the application unless otherwise amended by the following conditions:

- Site Plan Sheet 1 of 11 Rev A Project Number 14-2018-SPY;
- Floor Plan Sheet 2 of 11 Rev A Project Number 14-2018-SPY;
- Elevations Sheet 3 of 11 Rev A Project Number 14-2018-SPY;

- SRV Turning Movement Plan Sheet 11 of 11 Rev A Project Number 14-2018-SPY;
- GEN2. The development herein approved may not start until the following development permits have been issued and complied with as required:
 - Development Permit for Building Works; and
 - Development Permit for Plumbing and Drainage Work.
- GEN3. All works, including the repair or relocation of services (Telstra, lighting) is to be completed at no cost to Council.
- GEN4. Dust prevention measures must be undertaken to ensure that dust does not cause a nuisance to occupiers of adjacent properties.

Compliance Assessment

GEN5. All conditions of this approval are to be satisfied prior to Council issuing a Compliance Certificate for the commencement of the use, and it is the applicant's responsibility to notify Council to inspect compliance with conditions.

A Compliance Certificate fee will be charged, with payment required prior to Council approval of the associated documentation requiring compliance assessment.

Refuse Storage Collection

- MCU1. Provision must be made for the storage and removal of refuse in accordance with the *Environmental Protection (Waste Management) Regulation 2000.*
- MCU2. Any areas that are dedicated for the collection and/or storage of solid waste on the premises are to be:
 - a) level;
 - b) provided with impervious hard stand and drained; and
 - c) if facing either the street frontage or adjoining properties, screened by a 1.8m high fence around the full perimeter.
- MCU3. Refuse bin areas are to be provided for the washing out of the refuse bins and in connection with this:
 - a) all tap outlets must be fitted with backflow prevention devices;
 - b) the floor areas are to be drained to sewer; and
 - c) areas are to be covered and drainage designed such that water not associated with the washing out process (e.g. rainfall) does not enter the sewer.
- MCU4. Medical Waste Cytotoxic and infectious disease waste is not to be disposed of through the general waste stream. Cytotoxic and infectious disease waste must be disposed of via a regulated waste transporter/disposal operator.

Property Access

- ENG1. Property access shall be provided in accordance with the details in table S2.7 – Design and Construction Standards of the Kingaroy Shire Council IPA Planning Scheme; and IPWEAQ standard Drawing No. SEQ R-051, Type A, with dimension W1 being the greater of:
 - (a) 6.0m; and
 - (b) the minimum value necessary to meet the swept path requirements of the Small Rigid Vehicle (SRV) as defined in AS/NZS 2890.2, or the actual ambulance vehicle, whichever is the more onerous requirement.
- ENG2. Only one access to the site will be permitted.
- ENG3. Fencing, landscaping and letterboxes must not to impede sight lines for vehicles exiting the site.

- ENG4. Road works and entrances shall be constructed so as to:
 - (a) remove all disused vehicle entrances and reinstate kerbing consistent with the adjacent kerb profile;
 - (b) permit access and egress from the site in a forward gear;
 - (c) avoid a trip hazard to pedestrians; and
 - (d) ensure that low-clearance vehicles can clear the cross-over pavement upon entering and leaving the property.

Car Parking & Manoeuvrability

- ENG5. Before commencing use, provide at least eight (8) line-marked car parking spaces, in accordance with the requirements of Schedule 1 and Table S1.1 of the Kingaroy Shire Council IPA Planning Scheme and comprising of:
 - (a) seven (7) for B99 vehicles including one (1) disabled bay, in compliance with the requirements of the current version of AS/NZS 2890.1; and
 - (b) one (1) ambulance parking space 10.5m long, 3.5m wide and having 3.5m vertical clearance for a SRV vehicle, in compliance with the requirements of the current version of AS/NZS 2890.2.
- ENG6. The disabled car park shall be designed and constructed in accordance with the requirements of the current version of AS/NZS 2890.6.
- ENG7. All driveways, vehicle manoeuvring areas and turning radii shall be designed and constructed in all other respects in accordance with the requirements of the current version of AS/NZS 2890.1 for a B99 vehicle, except that the turning radii and areas used by the ambulance including the driveway, parking and manoeuvring areas shall be designed and constructed in accordance with the requirements of the current version of AS/NZS 2890.2 to suit both a Small Rigid Vehicle (SRV) and the Service Vehicle defined on Concept Plan *Turning Movements Plan 9*, Project No. 13-1744-SPY Sheet 20 dated 7th February 2014.
- ENG8. Before commencing use, provide for Compliance Assessment by Council's General Manager of Infrastructure *.DWG* format drawings demonstrating the turning templates required to both enter and exit the property at the proposed laneway cross-over in a forward direction and to enter and exit:
 - (a) all proposed parking bays (other than the Ambulance Bay) using a B99 class vehicle, meeting the requirements of Australian Standard AS/NZS 2890.1, including a clearance of 300mm to both sides of the turning path as required by clause B3.2 of AS/NZS 2890.1
 - (b) the proposed Ambulance Parking Bay, using a Small Rigid Vehicle as defined in AS/NZS 2890.2, including a clearance of 300mm to both sides of the turning path as required by clause 5.4 of AS/NZS 2890.2.
- ENG9. Kerbing associated with the car parking bays shall be low enough to provide for clearance under vehicles as the B99 swept vehicle path intrudes over them.
- ENG10. The car parking areas and internal driveways shall be constructed, drained and surfaced with either asphaltic concrete, bitumen or reinforced concrete; or where such surfacing exists but is damaged, repaired to the requirements of Council's General Manager of Infrastructure, so as to minimise dust emissions, erosion and sediment runoff. The construction and design shall be in accordance with the current version of AS/NZS 2890.1 and to the satisfaction of South Burnett Regional Council.

Kerb and Channel

ENG11. Kerb & channel to a profile matching the existing profile in the adjacent laneway shall be provided along the full frontage of the property.

- ENG12. Alternatively the applicant may pay a contribution to Council towards completion of the works equal to the value of the works to repair or replace the existing kerb and channel. The amount of the contribution shall be certified by Council prior to payment.
- ENG13. Before commencing use, provide a Signage and Linemarking Plan for the approval of Council's General Manager of Infrastructure and install the traffic management devices required in accordance with the Manual of Uniform Traffic Control Devices (MUTCD); ensuring that the plan provides for the use of vehicles, pedestrians and mobility aids for disabled access. Driveways and car parking areas shall be adequately sign-posted indicating combined usage by pedestrians and vehicles.

Stormwater

- ENG14. All stormwater drainage systems, including all surface, underground and roof water components:
 - (a) shall effectively drain all stormwater falling onto the proposed development to Council's stormwater system, rain water tanks or other lawful point of discharge;
 - (b) shall enable the post-development flows at the point of discharge to all downstream properties including road reserves to remain consistent with the predeveloped case;
 - (c) shall be designed such that no restriction to existing or developed stormwater flow from upstream properties or ponding of stormwater within upstream properties occurs as a result of the development.
- ENG15. Heavy duty galvanized steel roof water kerb adaptors (Kacey or similar), shall be installed in the kerb and channelling during construction in all locations where interallotment drainage systems are not required; in accordance with South Burnett Regional Council requirements and to the satisfaction of Council. Stormwater socket reducers may be required to accommodate these, depending on the pipe diameters proposed
- ENG16. All stormwater systems must be constructed before commencing any approved use or building works.
- ENG17. Any new earthworks, landscaping, pavements or structures shall not concentrate or impede the natural flow of water across property boundaries and onto any other lots.

Advice

- ADV1. With the introduction of the Sustainable Planning (Housing Affordability and Infrastructure Charges Reform) Amendment Act 2011, an applicant's obligations with respect to infrastructure contributions/charges is now contained in a separate adopted infrastructure charges notice rather than in this development approval.
- ADV2. Section 341(1) of the Sustainable Planning Act 2009 provides that, if this approval is not acted upon within the period of four (4) years the approval will lapse. Note that in accordance with section 341(7) a related approval may extend the relevant (currency) period.
- ADV3. This development approval does not authorise any activity that may harm Aboriginal Cultural Heritage. Under the *Aboriginal Cultural Heritage Act 2003* you have a duty of care in relation to such heritage. Section 23(1) provides that "A person who carries out an activity must take all reasonable and practicable measures to ensure the activity does not harm Aboriginal Cultural Heritage." Council does not warrant that the approved development avoids affecting Aboriginal Cultural Heritage. It may therefore, be prudent for you to carry out searches, consultation, or a Cultural Heritage. The Act and the associated duty of care guidelines explain your obligations in more detail and should be consulted before proceeding. A search can be arranged by visiting

http://www.datsima.qld.gov.au and filling out the Aboriginal and Torres Strait Islander Cultural Heritage Search Request Form

- ADV4. Attached for your information is a copy of Division 8 of the *Sustainable Planning Act* 2009 as regards Rights of Appeal. With respect to Appeal Rights of Applicants, the following is drawn to your attention—
 - (a) the applicant's Appeal Period commences upon receipt of this advice and expires twenty (20) business days thereafter.
 - (b) should the applicant notify the Assessment Manager (Council) in writing of acceptance of the conditions of approval and that it is not intended to make an appeal, the Applicant's Appeal Period is at an end.

Resolution:

Moved Cr KM Campbell, seconded Cr DP Tessmann.

That the Officer's Recommendation be adopted

Carried 7/0 FOR VOTE - Councillors voted unanimously
