

# **Drinking Water Quality Management Plan (DWQMP) report**

**2019-2020**

**SOUTH BURNETT  
REGIONAL COUNCIL**

SPID	491
Name	South Burnett Regional Council
Address	PO Box 336 Kingaroy QLD 4610
Telephone	07 4189 9100
Email	<a href="mailto:water@southburnett.qld.gov.au">water@southburnett.qld.gov.au</a>
Website	<a href="http://www.southburnett.qld.gov.au">www.southburnett.qld.gov.au</a>
LGA covered by this plan	South Burnett Regional Council
Water Supply Schemes covered by this plan	Blackbutt, Kingaroy, Murgon, Nanango, Proston, Wondai, Yallakool, Boondooma Dam

## Glossary of terms

<b>ADWG 2011</b>	Australian Drinking Water Guidelines (2011). Published by the National Health and Medical Research Council of Australia
<b>DWQMP</b>	Drinking Water Quality Management Plan
<b><i>E. coli</i></b>	<i>Escherichia coli</i> , a bacterium which is considered to indicate the presence of faecal contamination and therefore potential health risk
<b>HACCP</b>	Hazard Analysis and Critical Control Points certification for protecting drinking water quality.
<b>mg/L</b>	Milligrams per litre
<b>SBRC</b>	South Burnett Regional Council
<b>NTU</b>	Nephelometric Turbidity Units
<b>MPN/100mL</b>	Most probable number per 100 millilitres
<b>CFU/100mL</b>	Colony forming units per 100 millilitres
<	Less than
>	Greater than
<b>WTP</b>	Water Treatment Plant

# 1. Introduction

This report documents the performance of South Burnett Regional Council's drinking water service with respect to water quality and performance in implementing the actions detailed in the drinking water quality management plan (DWQMP) as required under the *Water Supply (Safety and Reliability) Act 2008* (the Act).

The report assists the Regulator to determine whether the approved DWQMP and any approval conditions have been complied with and provides a mechanism for providers to report publicly on their performance in managing drinking water quality.

This report has been prepared in accordance with the *Water Industry Regulatory Reform – drinking water quality management plan report factsheet* published by the Department of Energy and Water Supply, Queensland, accessible at [www.dews.qld.gov.au](http://www.dews.qld.gov.au).

# 2. Overview of Operations

South Burnett Regional Council water reticulation schemes service the townships of Blackbutt, Kingaroy, Murgon, Nanango, Proston and Wondai, with two smaller drinking water systems at Yallakool and Boondooma Dam tourist parks also operated under the approved DWQMP. The following table provides operational information for each scheme.

WATER SUPPLY SCHEME	TREATMENT PLANT	WATER TREATMENT PROCESS	CAPACITY
<b>Blackbutt</b>	Blackbutt WTP	<ul style="list-style-type: none"><li>• Flocculation</li><li>• Sedimentation</li><li>• Filtration</li><li>• Disinfection</li></ul>	1.15 ML/day
<b>Kingaroy</b>	Gordonbrook WTP	<ul style="list-style-type: none"><li>• PAC Dosing</li><li>• Coagulation</li><li>• Settling</li><li>• Clarification</li><li>• Floatation</li><li>• Filtration</li><li>• Disinfection</li></ul>	9.72 ML/day
<b>Murgon</b>	Murgon WTP	<ul style="list-style-type: none"><li>• Flocculation</li><li>• Sedimentation</li><li>• Filtration</li><li>• Disinfection</li></ul>	2.8 ML/day
<b>Nanango</b>	Nanango WTP	<ul style="list-style-type: none"><li>• Disinfection</li></ul>	1.4 ML/day
<b>Proston</b>	Proston WTP	<ul style="list-style-type: none"><li>• Flocculation</li><li>• Sedimentation</li><li>• Filtration</li><li>• Disinfection</li></ul>	0.5 ML/day
<b>Wondai</b>	Wondai WTP	<ul style="list-style-type: none"><li>• Flocculation</li><li>• Dissolved Air Flotation</li><li>• Filtration</li><li>• Disinfection</li></ul>	3.3 ML/day
<b>Yallakool</b>	Yallakool WTP	<ul style="list-style-type: none"><li>• Flocculation</li><li>• Filtration</li><li>• Disinfection</li></ul>	0.2 ML/day

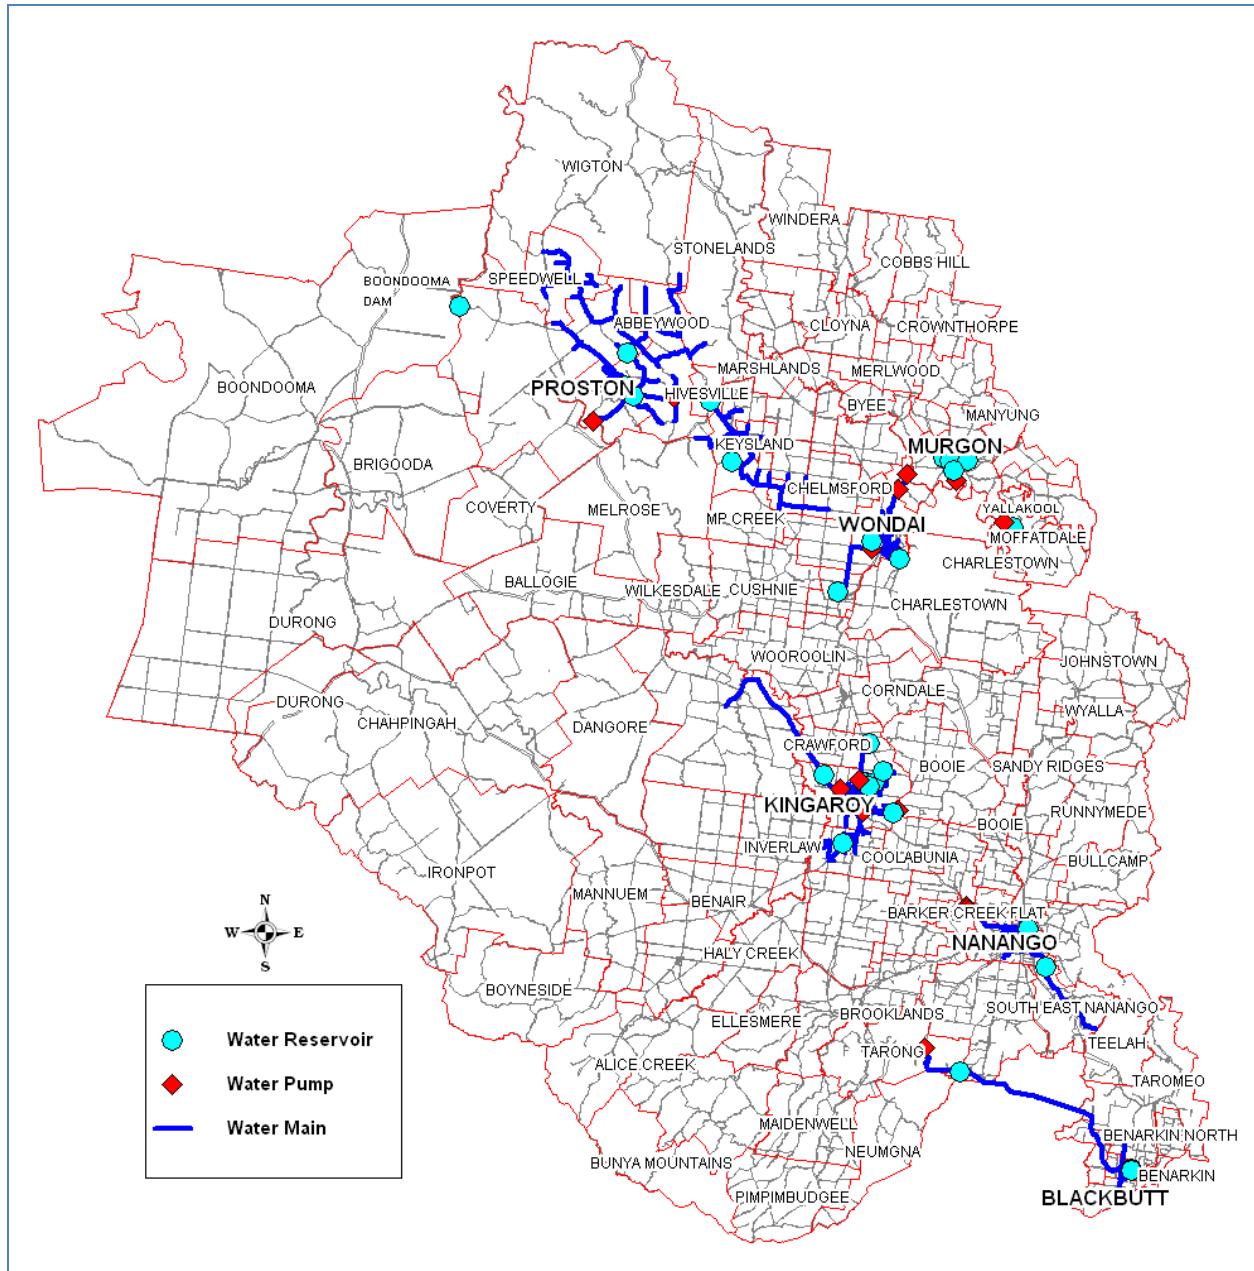

<b>Boondooma Dam</b>	Boondooma Dam WTP	<ul style="list-style-type: none"> <li>• Flocculation</li> <li>• Sedimentation</li> <li>• Filtration</li> <li>• Disinfection</li> </ul>	0.12 ML/day
----------------------	-------------------	-----------------------------------------------------------------------------------------------------------------------------------------	-------------

Water is disinfected with chlorine (liquid sodium hypochlorite) before entering the reticulation system and is transferred from the treatment plants to storage reservoirs through the reticulation systems.

SBRC provided fluoridated water for five schemes, those being Blackbutt, Kingaroy, Murgon, Nanango and Wondai. However, Council voted to cease fluoridation of all water supplies from January 2013. The fluoride plants have been decommissioned, and no fluoride has been stored onsite since the decision to cease fluoridation.

South Burnett Regional Council maintains in excess of 550 kilometres of water mains supplying approximately 9,730 properties through the South Burnett. The networks also comprise a total of 31 pump stations and 31 reservoirs with a total capacity of approximately 21.21 ML, and 10 re-chlorination stations. Figure 1 shows the extent of the South Burnett Regional Council's potable water distribution system; including areas serviced and the location of drinking water infrastructure.

**Figure 1: Overview Map of South Burnett Regional Council's Potable Water Distribution Network**

### 3. Actions taken to implement the DWQMP

#### 3.1 Progress in implementing the risk management improvement program.

All of the risks identified during the risk assessment workshop were reduced to either a low or medium level with the mitigation measures in place and risk reduction actions identified. Details of the outcomes of the proposed risk reduction actions are detailed in Table 1.

**Table 1 Implementation of Risk Management Improvement Program**

Below is the current RMIP.

Ref	Scheme component / Sub-component	Hazard / Hazardous event	Priority	Action(s)			Target date(s)	Estimated cost	Responsibility	Comments
				Interim	Short-term	Long Term				
<b>Completed Tasks</b>										
S1	Catchment and Operations	Loss of Key staff, operational knowledge	Medium	Review O&M manuals to ensure they are sufficient for the purpose. (See S2)		Complete O&M's for Nanango, Proston and Yallakool WTP's. See below	Complete	N/A	N/A	Operational staff has now either been formally trained to Certificate II & III levels or are actively being trained to complete this training. All operators/team members are utilised in a staff roster rotations. Operators/team members are confident in operating all plants. The large water treatment plants, and reticulation now have operation - maintenance manuals and procedures. This risk is now deemed complete.
S2	Catchment and Operations	Loss of Key staff, operational knowledge	High	Review all operation and maintenance manuals, including sampling data, handling, and communication procedures.		Complete O&M's for Nanango, Proston and Yallakool WTP's. See below	Complete	N/A	N/A	SBRC completed procedures for reticulation and all large water treatment plants Operation and Maintenance manuals as per section 5.2. The remainder O&M's required have now been identified in the below item.
S3	Catchment and Operations	Currently there is no promulgation of the Incident and Emergency Response Plan, and no linkage of it to the Regional Disaster Management Plan.	Medium	Review Incident and Emergency Response Plan and document the linkages into Regional Disaster Management Plan.			Completed 31 December 2013	N/A	N/A	SBRC endorsed Councils revised South Burnett Local Disaster Management Plan on 18 February 2014. Linkages to the SBLDMG and responsibilities have been added to the DWQMP Incident and Response Plan (refer Appendix 1). Promulgation of the Incident and Response Plan through the South Burnett Local Disaster Management Group (SBLDMG) was achieved during the SBLDMG meeting on the 16 June 2014. The linkages between the South Burnett Local Disaster Management Plan and Councils DWQMP were presented at this meeting by Russell Hood (General Manager -Infrastructure) Minutes of the meeting are attached in Appendix B. This risk is now deemed complete.
S4	Kingaroy Scheme	Re-Chlorination	Medium	Engineer to investigate flow and dosing rates.			Completed	N/A	WE	Upon completion of the Gordonbrook Water Treatment Plant, organics removal has been increased allowing the redosing stations flow rates reduced. Future operational adjustments will be upon engineering recommendations. This risk is now considered acceptable.
S5	Yallakool WTP	Lack of significant Operation data	Low	Include verification, raw and treated water data in DWQMP		Include in plan	Completed	N/A	TC	Verification monitoring is now included in the DWQMP. This is now considered an acceptable risk.
S7	Boondooma and Proston Water Treatment Plant	No connection to SCADA	Low	For the Interim and short term existing operational visits will remain. These are considered satisfactory, however connection to SCADA will aid in operational procedures.		Complete project.	Nov-17	N/A	WE	SCADA projects completed November 2017
S8	All Areas	IT Systems damaged by network access or possible intrusion via external contractors inc. scada programmers, electricians, process engineers, instrument technicians	Low	Existing preventative measures are considered suitable.			Cyber security complete	N/A	Manager ICT	To date no issues with this hazard however need to undertake a vulnerability assessment to be completed by 30th June 2020
<b>Current Tasks</b>										
S6	Nanango, Proston and Yallakool Water Treatment Plant	Lack of Operation and Maintenance Manual	Low	Operators are very familiar and well trained in the operation of this system.		Complete O&M's for this plant as mentioned in section 5.3	Jun-20	N/A	MWW, WE, TC	SBRC has prioritised the completion of O&M's for the larger water treatment plants. The small plants planned to be complete by the target date mentioned.
S9	All Areas	ICT patches and upgrades of hardware and software failure.	Low	Existing preventative measures are considered suitable.			Jul-20	N/A	Manager ICT	To date no issues with this hazard however process to be implemented for upgrades to be updated regularly
S10	All Areas	Loss of supply to drought	Low	Review any existing documentation and provide a plan.			Jun-21	N/A	MWW	Consultants are currently reviewing the Drought Management Plan
S11	All Areas	High THM's	Low	Secure budget allocation to complete a review.			Jul-21	N/A	MWW	THM review by external water quality expert or auditor to ensure best practices are adopted.
S12	All Areas	Procedures	Low	Procedures are in draft mode	Operational staff have performed these tasks and formalising the process and training for new operational staff.	Complete draft procedures and complete operational training.	Aug-21	N/A	MWW	THM review by external water quality expert or auditor to ensure best practices are adopted.

### **3.2 Amendments made to the DWQMP**

Operational monitoring is conducted as per the DWQMP Version 7.1 2019. An increase in some additional water quality parameters have been implemented in a few locations. These minor changes have not influenced or required any changes to the risk evaluations.

#### **3.2 Amendments made to the DWQMP Risk Management Improvement Program**

Amendments made to the RMIP are currently under review.

## **4. Compliance with water quality criteria for drinking water**

The water quality criteria mean health guideline values in the most current Australian Drinking Water Guidelines, as well as the standards in the Public Health Regulation 2005.

Results from water quality analysis is located in Appendix A.

## **5. Notifications to the Regulator under sections 102 and 102A of the Act**

This financial year there was one instances where the Regulator was notified under sections 102 or 102A of the Act. None of these notifications involved the detection of *E. coli* – an organism that may not directly represent a hazard to human health but indicates the presence of recent faecal contamination.

The non-compliance with water quality criteria caused by THM's. None of these incidents required South Burnett Regional Council to issue a boil water or do not drink notice in the communities.

### **Non-compliances with the water quality criteria and corrective and preventive actions undertaken**

**Incident Description: DWI-7-491-73 Kingaroy Scheme**

The 1<sup>st</sup> non-compliance was detection of high THM's detected 4/6/19 of 320 ug/L at the Taabinga Reservoir. Other reservoirs also had elevated levels. This incident carried into the reporting year 19/20.

**Corrective and Preventative Actions:**

Disinfection residuals are continuing to be optimised to reduce disinfection by products. Water storage levels have been reduced in capacity to reduce water age in the networks. Due to drought conditions, a rise in Bromide levels in the raw water supply is resulting in elevated THM's.

## 6. Customer complaints related to water quality

South Burnett Regional Council is required to report on the number of complaints, general details of complaints, and the responses undertaken.

Throughout the year the following complaints about water quality were received:

**Table 2 - complaints about water quality.**

Health Concern	Discoloured water	Taste and odour	Total
Blackbutt	1		1
Kingaroy	7		7
Murgon	2		2
Nanango	2		2
Wondai	1		1
Boondooma Dam			0
Yallakool			0
Total	0	13	13

### **Health Concern:**

Complaints are sometimes received from customers who suspect their water may be associated with an illness they are experiencing. South Burnett Regional Council investigates each complaint relating to an alleged illness, typically by follow up testing of the customer's tap water and closet reticulation sampling point.

### **Discoloured water:**

Fourteen customer complaints were received by South Burnett Regional Council between July 2018 – June 2019 related to dirty water. Complaints received for dirty water were primarily the result of discoloured water due to sloughing in water main or white water due to the presence of entrapped air. Occasionally, complaints arise when there has been a failure within the reticulation system, such as a broken water main or fire hydrant testing. Oxidising iron and manganese within the reticulation network can also occur. Flushing and scouring is often used to rectify these issues.

### **Taste and odour:**

Taste and odour enquiries varied widely based on customer's perception. SBRC received one complaint related to taste and odour during the July 2018 – June 2019 reporting period. The most common complaints included chlorine, metallic and chemical tastes. Often when customers receive water from a different source (for example, switching between Boondooma Dam and Gordonbrook Dam source water supplies) the change in taste is noticeable.

South Burnett Regional Council has operational procedures in place for dealing with dirty water, taste and odour or illness related enquiries. All customer complaints are reviewed thoroughly by South Burnett Regional Council's Water and Wastewater section and acted upon as necessary.

## 7. Findings and recommendations of the DWQMP auditor

The current approved DWQMP is Version 7.1, 2019.

The regulated audit of South Burnett Regional Councils DWQMP was completed and given to the regulator by **30 January 2017**. The next audit is due to be completed by 31 July 2021.

A report summarising South Burnett Regional Council's progress in implementing the Risk Management Improvement Program "System" items references as S3 is complete and S1, S2 are still ongoing and must be provided to the regulator biannually.

DWQMP Version 1.7 2019 is the approved version by the regulator.

## Appendix A – Summary of compliance with water quality criteria

The results from the verification monitoring program have been compared against the levels of the water quality criteria specified by the Regulator in the *Water Quality and Reporting Guideline for a Drinking Water Service*.

The reported statistics do not include results derived from repeat samples, or from emergency or investigative samples undertaken in response to an elevated result.

Verification monitoring was conducted as per DWQMP.

### Verification monitoring results

<b>CALCULATE PERCENTAGE USING A TWELVE (12) MONTH 'ROLLING' ANNUAL VALUE</b>												
The Public Health Regulation 2005 (the regulation) requires that 98 per cent of samples taken in a 12 month period should contain no <i>E. Coli</i> . This requirement is referred to as the 'annual value' in Schedule 3A of the regulation.												
This requirement comes into effect once you have 12 months data and should be assessed every month based on the previous 12 months data (so that it is a 'rolling' assessment).
