

VISION

To provide improved visual streetscape and tree planting that embrace the sense of the place, the town's historical context and it's regional uniqueness within the South Burnett.

DESIGN INTENT

The landscape design of the streetscape will embrace the local historical context and environment of the town through:

- The use of earthy colours in the buildouts.
- The rural feel and use of 'timber and tin' shelter and notice board.
- Rural look and feel of the seating.

The plant species selection with reflect the rural character of the local environment using mainly endemic species.

DESIGN STRATEGY

- Introduce new tree planting that is within the wide road corridor to 'soften' and create visual cues the slow traffic whilst travelling through the town.
- Provide a safe crossing location at the northern part of the main street.
- Provide a weather protection shelter close to the bus stop.
- Provide a community area with notice board, seating and artwork lantern.
- Plant species that reflect the local environment.
