

# Coordinator Regulatory Services

- **Lead compliance & regulatory services performance**
- **Travel between offices within the region**
- **Competitive remuneration package offered**

The South Burnett region is uniquely positioned to offer lifestyle and employment opportunities that other regions can only envy. The region covers a geographical area of approximately 8,400km<sup>2</sup> and is home to 32,500 people. Natural surrounds and rolling landscape give the region a relaxed atmosphere. An array of services, retail and events can be found across the region, along with high-quality educational, medical and recreational facilities. All this while being tantalisingly close to Brisbane and the Sunshine Coast.

Reporting to the Manager Environment & Planning, you will provide coordination and direction to the Natural Resource Management, Environmental Health and Compliance teams within the Environment and Planning Branch to promote and deliver high quality outcomes to the community in parallel with contributing to corporate governance and strategic planning in Council.

To be successful in this role, you can demonstrate previous experience leading and supervising a team of officers to undertake a variety of environmental health activities including natural resources, food safety and licensing, public health, contaminated lands, land use conflicts and development-related matters that encompass local laws and compliance.

Bringing maturity and demonstrated understanding of working in an environment where balancing the needs of multiple stakeholders is achieved through the lens of good corporate and legislative governance, you will allocate and monitor workloads, resolve escalated customer and procedural issues by providing advice and exercising sound judgement and initiative. Additionally, you'll review internal processing surrounding case management and facilitate effective community consultation on aspects relating to the portfolio, including identifying with peers, educational programs for staff and the community.

Ideally you bring experience gained in Local Government, tertiary education or equivalent qualification, a high level of skill associated with understanding and applying legislation, statutory regulations and guidelines relevant to compliance within environmental health and land management.

To find out more about the opportunity and application process, obtain a comprehensive Candidate Information Pack - visit [mcarthur.com.au](http://mcarthur.com.au) and enter **145681** in the job search function.

For a confidential discussion, call **Rebecca McPhail** on **(07) 3211 9700**.

**Applications close COB 29 May 2023.**
