7.21 WATER SUPPLY ACCESS CHARGE METHODOLOGY 2023/2024

RESOLUTION 2023/618

Moved: Cr Jane Erkens Seconded: Cr Scott Henschen

That pursuant to Section 92(4) of the Local Government Act 2009 and Section 99 of the Local Government Regulation 2012 Council make and levy water utility charges based on the following methodology to determine water access charges to be levied for the financial year ending the 30 June 2024 as follows:

- A Fixed Charge for all connected and vacant (not connected) land covering the net cost associated with the source of supply, administration, technical overhead, depreciation and finance costs for each scheme area be levied on those lands receiving a supply or to which a supply is deemed to be available
- 2. The basis of apportionment of this cost shall be the supply capacity made available to the connected premises, as a measure of the proportionate share of the capacity of the system utilised by the connected property, as listed in the table hereunder:

Meter Size	Capacity Factor
20mm	1.0
25mm	1.6
32mm and 40mm	2.5
50mm and 80mm	6.5
100mm	15.0
Vacant (not connected)	0.5

- 3. This direct correlation is varied as follows:
 - (a) All connections below 25mm are deemed to be the same capacity;
 - (b) Domestic properties which due to low pressure related matters only, require the installation of a larger than normal (20 mm) water meter, are to be charged the equivalent of a 20mm connection base charge;
 - (c) Domestic properties which due to low pressure related matters only, require the installation of an additional water meter, are to be charged the equivalent of a single 20mm connection base charge only;
 - (d) In the case of units as defined under the Body Corporate and Community Management Act 1997 where the complex has a main meter, and individual units do not have an individual meter, then the base water charge for each unit will be levied as if the unit had a 20mm service connected;
 - (e) In the case where there are 2 or more lots and an improvement is constructed across a property boundary, provided that a connected access charge is being levied for one lot, then vacant charges will not apply to the other vacant (land not connected to the water system) lot;
 - (f) In the case of properties defined as "Rural", except for properties connected to the Proston Rural Water Scheme, under Council's differential rating criteria where multiple services are connected a charge for each additional connection shall be 50% of a single 20mm base charge;
 - (g) In the case of properties on the Proston Rural Supply Scheme an access charge for each connection will apply;

(h) In the case where a specifically dedicated metered service connection is provided for fire-fighting capability a charge for each service shall be 50% of a single 20mm access charge.
